

IN THE UNITED STATES DISTRICT COURT
FOR THE WESTERN DISTRICT OF PENNSYLVANIA

UNITED STATES OF AMERICA

v. CRIMINAL NO. 05-26 ERIE

GEORGE L. EBERLE
ALESHA M. EBERLE

HEARING ON PRETRIAL MOTIONS

Proceedings held before the HONORABLE
SEAN J. McLAUGHLIN, U.S. District Judge,
in Courtroom C, U.S. Courthouse, Erie,
Pennsylvania, on Tuesday, March 7, 2006.

APPEARANCES:

CHRISTIAN A. TRABOLD, Assistant United States
Attorney, appearing on behalf of the Government.

THOMAS W. PATTON, Assistant Federal Public

Defender, appearing on behalf of Defendant
George Eberle.

MICHAEL R. HADLEY, Esquire, appearing on behalf
of Defendant Alesha Eberle.

Ronald J. Bench, RMR - Official Court Reporter

2

3 (Whereupon, the proceedings began at 9:05 a.m., on

4 Tuesday, March 7, 2006, in Courtroom C.)

5

6 THE COURT: This is the time we set for hearing

7 argument on the defendants' motion to suppress. The

8 defendants' motion to sever for trial at Counts Three and Four.

9 And defendant Alesha Eberle's motion in limine. Did I miss
10 anything?

11 MR. PATTON: I don't believe so, your Honor. I
12 would like to clarify on the record that we had filed
13 additional pretrial motions that dealt with Counts One and Two
14 of the indictment. But I have been informed, along with the
15 court, by Mr. Trabold that the United States is going to
16 dismiss Counts One and Two, mooted out the pretrial motion we
17 had filed with regards to Counts One and Two.

18 THE COURT: I think that is an appropriate
19 clarification. Maybe you would want to do that for the record
20 right now?

21 MR. TRABOLD: If the court wants me to file a
22 written motion, but I certainly can do it on the record.

23 THE COURT: Oral is fine right now.

24 MR. TRABOLD: For the reasons we discussed in
25 chambers I believe last Thursday, primarily that the victim in

1 this case, Tiffany Smith, now says that the pictures that form

2 the basis for Counts One and Two of the indictment, she says

3 those pictures are not of her. The government would move to

4 dismiss Counts One and Two of the indictment. Which leaves

5 just Counts Three and Four for our purposes here today.

6 THE COURT: All right, then those counts are

7 dismissed. Are we ready to go?

8 MR. TRABOLD: Yes, your Honor.

9 THE COURT: All right, let's go.

10 MR. TRABOLD: Your Honor, if I could just put one

11 thing on the record before we call our witness. Typically,

12 obviously in a search warrant type setting, the four corners of

13 the warrant are what controls. I think this essentially

14 amounts to counsel requesting a Franks hearing in this case.

15 But based on what I know about the case, it appears to me a

16 Franks hearing is appropriate, based on what counsel are

17 claiming are the claimed defects in the warrant.

18 THE COURT: I view the suppression aspect as likely

19 generating a Franks hearing, that's really what you're asking

20 for, isn't it?

21 MR. PATTON: Yes, sir.

22 THE COURT: That's what we're going to have then.

23 MR. TRABOLD: Thank you. The government calls
24 county detective Jessica Lynn.

25 THE COURT: Come over here, my clerk will swear you

5

1 in.

2 JESSICA LYNN, GOVERNMENT WITNESS, SWORN

3 DIRECT EXAMINATION

4 BY MR. TRABOLD:

5 Q. Ma'am, where are you employed -- where do you work,
6 ma'am?

7 A. The Erie County District Attorney's office.

8 Q. In what capacity?

9 A. As an Erie County detective.

10 Q. How long have you been a county detective?

11 A. For over three years.

12 Q. Prior to becoming a county detective, did you work in
13 some capacity at the Erie County DA's office prior to
14 officially being a county detective?

15 A. Yes, I was their intern for the summer of 2001, and then

16 I was hired as an assistant county detective up until the time

17 when I was hired as a full-time county detective.

18 Q. And are you assigned to investigate a particular class of

19 cases now as a county detective?

20 A. Yes, I am.

21 Q. Can you explain what that class of cases is to the judge,

22 please?

23 A. Sure. I'm employed to investigate child abuse and high

24 tech computer crime investigations. I also incorporate those

25 two together to investigate Internet crimes against children

6

1 investigations.

2 Q. And would it be accurate to say that along those lines

3 you've received training in computer investigations and also in

4 child exploitation?

5 A. Yes, I have.

6 Q. First, with regard to computer training, what is the

7 nature, just in general terms, of the computer training that

8 you received?

9 A. Well, I'm a trained computer forensic examiner. I am

10 able to forensically examine electronic media storage devices

11 to find information that may be on them.

12 Q. And what is your educational background?

13 A. I received a bachelor's degree from Edinboro University

14 in criminal justice.

15 Q. Okay. Approximately, how many hours of training would

16 you say you received in what I'll generally call computer

17 forensics?

18 A. I'd say about 300, close to 300.

19 Q. And those would be along the lines of training seminars

20 that you've attended while employed at the DA's office?

21 A. Seminars and hands-on.

22 Q. I'm sorry, I didn't hear what you said?

23 A. And hands-on in the classes.

24 Q. Okay. Now, with regard to child exploitation, how many

25 hours of training would you say you received in that regard,

1 approximately?

2 A. I'd say close to a hundred hours.

3 Q. And day-to-day your cases typically involve child

4 exploitation?

5 A. Yes.

6 Q. And how many cases have you charged where you've been the

7 affiant in a child exploitation related crime?

8 A. I believe six.

9 Q. And separate and apart from the cases where you've been

10 the affiant, how many computers have you done a forensic exam

11 on relative to child exploitation cases, approximately?

12 A. Just child exploitation, I would have to say close to 30.

13 Q. Have you done forensic exams in computer cases unrelated

14 to child exploitation?

15 A. Yes, I have.

16 Q. And those would be any and all types of crimes, white

17 collar, perhaps even some violent crime?

18 A. Yes, harassment, credit card, identity theft.

19 Q. And have you also been the affiant on search warrants for

20 computers relative to your investigations?

21 A. Yes, I have.

22 Q. Approximately, how many times?

23 A. Definitely the six that I've charged.

24 Q. Separate and apart from arrests or anything like that,

25 are you currently working on what I'll term online

1 investigations?

2 A. Yes.

3 Q. Explain to the judge what you mean by online

4 investigations?

5 A. Sure. As part of Internet crimes against children, we do

6 what are called proactive and reactive investigations. A

7 proactive investigation is when the officer poses online in a

8 chat room or instant messaging in a chat room. They also pose

9 online, which I have done, as a parent of a child, too. The

10 reactive part of the investigation is when we currently or

11 actively investigate with another police department or the

12 National Center for Missing and Exploited Children has sent to

13 us a report.

14 Q. So proactive is you online in an undercover capacity

15 interacting with people who may be attempting to or are engaged

16 in child exploitation?

17 A. Yes, I pose as a 13-year-old, a 14-year-old and a

18 35-year-old female, who is the mother of my 13-year-old person.

19 Q. And the reactive investigations are a police department

20 in Houston sends you information, hey, we think we have

21 somebody in Erie that you need to look at?

22 A. Yes, that's what's called Cybertips, which comes from the

23 National Center for Missing and Exploited Children.

24 Q. Now, as part of not only your training but also your

25 experience, have you become familiar with what I'll term

9

1 collector characteristics for people that collect or keep child

2 pornography?

3 A. Yes.

4 Q. And would you characterize this as well-known within the

5 child exploitation investigative community that people who are

6 interested in child pornography typically keep the material?

7 A. Oh, yes.

8 Q. And do they keep it for an extended period of time or

9 very briefly?

10 A. Extended periods of time.

11 Q. And there are a number of reasons why folks interested in

12 child pornography might keep it for a lengthy period of time?

13 A. Yes.

14 Q. And one of those reasons is -- well, let me phrase it
15 this way. In your experience is it your understanding that
16 people interested in child pornography often have a specific
17 age range that they're interested in?

18 A. Yes, they have a special preference.

19 Q. Just by way of example, defendant X might be interested
20 in 10-year-old boys?

21 A. Correct.

22 Q. And then somebody else that you encounter might be
23 interested in 14-year-old girls?

24 A. Yes.

25 Q. And that is most typically the case, that people have a

10

1 focused interest range?

2 A. Most of the time.

3 Q. In your experience and in your training, is it your
4 understanding that these individuals will often trade the
5 pictures of child pornography that they have?

6 MR. HADLEY: Objection, your Honor, I know we don't
7 have a jury here, but he is really leading his own witness

8 through this, I'd like to hear it from her.

9 THE COURT: Overruled.

10 BY MR. TRABOLD:

11 Q. Is it your understanding that people interested in this
12 type of material often trade with other people?

13 A. Yes, they'll collect their special preference, but
14 they'll also collect other pictures in order to be able to
15 trade with other people that they might be communicating with
16 in order to get the rest of their collection.

17 Q. So if I'm interested in 14-year-olds, I might keep some
18 pictures of 10-year-olds so I can trade and get pictures of
19 14-year-olds?

20 A. Yes.

21 Q. Is it your experience that individuals interested in this
22 type of material develop an emotional tie to the images?

23 A. Yes, a majority of the time they use them for sexual
24 gratification.

25 Q. Because of that emotional tie, does that tie into them

1 wanting to keep the images for a lengthy period of time?

2 A. Yes.

3 Q. Now, is it your experience or do you know this from your

4 training, do individuals that have this type of material

5 sometimes show it to minors?

6 A. Yes.

7 Q. Why do they do that?

8 A. To lower inhibitions of children.

9 Q. What is their purpose in lowering children's inhibitions?

10 A. To let them know that other kids do this and that it's

11 okay.

12 Q. Now, would you characterize the availability -- or let me

13 rephrase that. In your experience and based on what you know

14 from your training, is it easy to obtain child pornography from

15 the Internet?

16 A. No.

17 Q. What I mean by that, is it your experience or do you have

18 specific information to share that persons interested in child

19 pornography, do they just go to Google and type in child

20 pornography and up it comes?

21 A. No, it does not come up when you type that in.

22 Q. What is your experience with how the typical seeker of

23 child pornography obtains it from the Internet?

24 A. It's usually, a lot of times it will be in an underground

25 chat room, where they'll be able to communicate with other

12

1 people like -- as if they're collector items. Also, there are

2 a lot of code terms that you have to use in order to find the

3 pictures. People who are familiar with this type of stuff,

4 such as child pornography, usually know those terms. One of

5 the big key search terms are child models, Lollita, stuff like

6 that. But just to type children pornography, you won't find

7 it, you have to actively search for these.

8 Q. And is it your experience that your typical user on the

9 Internet who's not interested in child pornography, are those

10 folks typically, do they typically encounter or are they

11 bombarded with child pornography on their computer that they

12 did not seek out?

13 A. No.

14 Q. Now, are there potential pitfalls or difficulties for the

15 individual that's interested in getting child pornography onto

16 their computer; what types of things might they encounter that

17 make it difficult to obtain the material?

18 A. They always run the risk of communicating with a police
19 officer, there's a lot of us who are doing the proactive
20 investigations. They also run the risk of searching and
21 finding the pictures and having the search engine, such as
22 Yahoo and AOL, monitoring every move.

23 Q. Is there a risk they may be trying to seek out this
24 information and then place evidence that's detrimental to them
25 on their computer?

13

1 A. Yes.

2 Q. Is it your experience that individuals interested in this
3 type of material are often interested in instant gratification?

4 A. Yes.

5 Q. And what do you mean by that, what is the aspect of
6 instant gratification as it relates to these types of pictures?

7 A. When they want to look at the picture, they want to look
8 at it right then and there, they're not going to take the time
9 to go search the Internet, use code terms or take the risk of
10 entering a chat room to trade with someone.

11 Q. Now, is the typical collector -- can you characterize it,

12 is it in some ways like collecting other things?

13 A. Yes, I have actually had the defendants tell me that it's

14 like collecting baseball cards, it's their prize collection.

15 Q. What do they mean by that, what do you take them to mean

16 when they say it's like collecting baseball cards?

17 A. That they may have a favorite team as a baseball card,

18 they have a favorite sexual preference. Have it be children

19 under five or boys under 10-years-old. They will use that and

20 then trade the other pictures that they get with other people

21 to help complete their collection. Such as keeping baseball

22 cards for a particular team and trading other team members to

23 get that.

24 Q. Is that part of what leads you to the conclusion that

25 this type of material is kept for a length of time?

14

1 A. Yes.

2 Q. Now, I want to turn your focus to the case we're here on

3 today, the case involving George and Alesha Eberle. How did

4 you first become involved in this case?

5 A. I received a referral, a reactive investigation from

6 Delaware County, Pennsylvania.

7 Q. And what was the nature of that referral and when --

8 first of all, when did you receive that referral?

9 A. I believe it was August of '04.

10 Q. Okay. Late August, beginning or sometime in August?

11 A. I would have to look at my report to make sure.

12 Q. Well, you get a referral from them in August of '04, what

13 is the nature of the referral?

14 A. It's what's called a Cybertip from the National Center

15 for Missing and Exploited Children.

16 Q. What does the Cybertip say, in general terms?

17 A. That a particular user uploaded images suspected to be

18 child pornography to a Yahoo photo album account.

19 Q. And with these Cybertips, is the information typically

20 reported by the Internet service provider to the National

21 Center for Missing and Exploited children?

22 A. Yes, the service providers monitor the e-mails, anything

23 posted to accounts. And then if they find anything that is

24 suspected to be contraband, they notify the National Center for

25 Missing and Exploited Children.

1 Q. And that's what happened in this case?

2 A. Yes.

3 Q. You then receive information from the Delaware County
4 Child Exploitation Task Force?

5 A. Yes, they're actually the grant holder for the Internet
6 Crimes Against Children Task Force in Pennsylvania. They get
7 all the Cybertips, then they do the court orders to find out
8 the location of the suspect. And then they send it to that
9 agency.

10 Q. So in Pennsylvania whenever there is a Cybertip coming
11 from NCMEC, they all go to Delaware County then they're
12 distributed from there?

13 A. Yes.

14 Q. And does Delaware County, once they receive the tip,
15 conduct any investigation to see if they can pin down who the
16 person is that is the subject of the pictures?

17 A. They generally do a court order.

18 Q. Was that done in this case?

19 A. Yes.

20 Q. Was that information provided to you?

21 A. Yes.

22 Q. Did you follow-up on that information?

23 A. Yes, I did.

24 Q. What steps did you take?

25 A. I reviewed the information and found that the Yahoo photo

16

1 album that the pictures were uploaded to came back to a

2 George E., and had a zip code and date of birth. And the zip

3 code back to Corry.

4 Q. Based on that information to George E. in Corry, did you

5 follow up with the Corry Police Department?

6 A. Yes, I did.

7 Q. Based on your investigation with them, were you able to

8 come to a determination as to who this George E. that was the

9 subject of the Cybertip was?

10 A. Yes, the Yahoo screen name was glepa, g-l-e-p-a, 2001.

11 And it came through determination through the investigation

12 that glepa was George Eberle.

13 Q. And once you knew glepa was George Eberle, how did you

14 further the investigation from there?

15 A. I contacted the Office of Children and Youth and found
16 that they did have an OCY worker going to their house, and I
17 spoke with her in regards to computers.

18 Q. And what did that OCY worker tell you with regard to
19 George Eberle's possession of a computer?

20 A. The first time I spoke with her, she said that they did
21 have a computer and a web cam in their home.

22 Q. Did you inquire at that point in time with regard to
23 whether they had a computer back in 2001 or were you just
24 looking to try and obtain the computer that was currently there
25 in 2004?

17

1 A. Yes, I was looking for a computer, given the fact that
2 people who possess child pornography, in this case this
3 particular individual uploaded, which means they put onto this
4 Yahoo account images of suspected child pornography. It's
5 typically kept.

6 Q. Just so the record is clear, though, the information that
7 you received from the Cybertip, which you ultimately
8 investigated, you make the determination that George Eberle

9 uploaded the pictures that are the subject of the Cybertip onto
10 his Yahoo account?

11 A. Yes.

12 Q. And, again, just so the record is clear, what would the
13 pictures that are on a person's Yahoo account, just in general
14 terms, would those pictures, are they kept on the individual's
15 computer hard drive or are they kept on Yahoo's computer
16 equipment?

17 A. It could be both. They could store it on the server in
18 Yahoo, in this case it was in their photo album, which was on
19 Yahoo. But also they could save pictures in their My Documents
20 folder on their computer.

21 Q. And would you, as a computer investigator, would you
22 expect to find, if it was still the computer used to upload the
23 pictures to Yahoo, would you expect to find evidence of that
24 upload on the computer?

25 A. Yes.

1 Q. Now, do you do anything -- once you learn that the
2 Eberles have a computer and they use a computer from the OCY

3 worker, what steps do you take beyond that?

4 A. Well, I went and drafted a search warrant to obtain that

5 computer. And then when I spoke with the OCY worker again, I

6 believe it was a couple weeks later, but I'd have to double

7 check the report, it turned out that the computer was no longer

8 there.

9 Q. And did you then investigate the circumstances of why the

10 computer wasn't there?

11 A. Yes. She told me that she spoke with Mr. Eberle and

12 found that the computer had been taken by the place he rented

13 it from for lack of payment.

14 Q. Did you then change your search warrant in any way?

15 A. Yes, I immediately called the rental company, which I

16 believe was House of Television in Corry, and asked to find out

17 where that computer was. They told me that it was already

18 wiped by the system software and re-rented for approximately a

19 month.

20 Q. Okay. Just so the record can be as clear as possible and

21 the judge can be clear. When the House of Television told you

22 that the computer had been wiped, as a computer person, what

23 did you take that to mean?

24 A. That the information that would be easily accessible to
25 users, such as the items under My Documents or anything that

19

1 you can easily access, would no longer be available, it would
2 be in what's called unallocated space. Essentially, it was
3 deleted.

4 Q. Okay, just so again we can be clear. Is this typical in
5 the computer rental business?

6 A. Yes.

7 Q. Why?

8 A. So someone has a clean computer. A new user would be
9 able to have their own preferences on there.

10 Q. Let's say person A rents their computer, their rental
11 period is done, they return the computer back to the rental
12 place. If it's wiped and then re-rented to person B, can
13 person B access person A's information?

14 A. No.

15 Q. The reason for that is because it's in unallocated space
16 if there's any information left?

17 A. Right, unless they were a forensic examiner and had the

18 special software.

19 Q. The special software allows you to delve into areas of a
20 person's computer hard drive that the typical user could not
21 get to?

22 A. That's correct.

23 Q. And just so we can be as clear as possible, those would
24 typically be the areas where deleted items are kept on the
25 computer?

20

1 A. Yes.

2 Q. So the House of Television tells you the computer is
3 wiped and had been re-rented. Do they tell you for how long a
4 period of time the computer had been in the possession of the
5 new renter?

6 A. I would have to check my report, but I'm pretty sure it
7 was August 20th.

8 THE COURT: Of what year?

9 THE WITNESS: 2004, sir.

10 BY MR. TRABOLD:

11 Q. And so for a period of weeks the computer was already in

12 the new user's possession?

13 A. Yes.

14 Q. And then based on the information provided by the House

15 of Television, you then give to them a search warrant for the

16 computer?

17 A. Yes.

18 Q. Does the House of Television have the computer you want

19 immediately available for you?

20 A. No, they have to go take it from the other user.

21 Q. Now, before we get into what you found if anything on the

22 computer, does the wiping of the computer reduce, potentially

23 anyways, reduce its evidentiary value to you?

24 A. Yes.

25 Q. Why?

21

1 A. Because if the Eberles had used the computer, if

2 everything would be in unallocated space, it would be very hard

3 to determine if there was an image on there, who actually put

4 the image there.

5 Q. Now, does the re-renting of the computer reduce its

6 evidentiary value?

7 A. Yes.

8 Q. Again, explain why?

9 A. Because it's now in someone else's possession and any

10 item that they use, such as a document or a picture and they

11 delete, will also be in unallocated space. Once something goes

12 in unallocated space, it takes away the date and time stamp

13 that's put on there by the hard drive. So you no longer have

14 the time to match it up to the user.

15 Q. So you are now faced with executing a search warrant in

16 this first search on a computer that may have a significantly

17 reduced evidentiary value for you?

18 A. That is correct.

19 Q. Now, you get the computer, do you perform a forensic exam

20 on the computer?

21 A. Yes, I do.

22 Q. Do you find anything of evidentiary value on the

23 computer?

24 A. Absolutely not.

25 Q. And let's take that and do a few steps. Do you find

1 child pornography on the computer?

2 A. No.

3 Q. Do you find anything in any way linking that computer to

4 these two defendants?

5 A. No, I did not.

6 Q. Did you find anything -- were there items on the computer

7 that had nothing to do with them but which you were able to

8 easily locate?

9 A. Yes, there was documents from the new user. Pictures

10 from the new user.

11 Q. And when you got the computer, had the House of

12 Television attempted to wipe it again so the information from

13 the second renter wasn't on there, was that readily apparent?

14 A. No, they didn't wipe it again.

15 Q. I just want to make sure we're clear on the record with

16 this. You get the computer from them. When you do your exam,

17 are there, let's say, items on the new user's desktop that you

18 are able to easily take a look at?

19 A. Yes.

20 Q. Were there items on the computer that were not in

21 unallocated space that you could easily see?

22 A. Yes, but I was searching for unallocated space.

23 Q. And nothing whatsoever was found relative to the Eberles?

24 A. No, I did a search term for Eberle, for George and

25 Alesha, for the screen name glepa2001, and I knew from the

23

1 Office of Children and Youth worker that they had a web cam.

2 So I assumed that they would have taken pictures of their

3 children or them. I did have a copy of George's and Alesha's

4 IDs, through the use of JNET, driver's licenses and state IDs,

5 I did not find any picture whatsoever matching to the Eberles.

6 Nor did I find any information when I ran a search for their

7 names.

8 Q. Did you run what's known as a hash value check for the

9 pictures of the child pornography that you received from the

10 Cybertip?

11 A. Yes, I did.

12 Q. And can you explain to the judge what is a hash value --

13 I might not even be using the right term, but when you check a

14 hash value, what does that even mean?

15 A. Every picture has what's called a MD5 hash, which

16 essentially in layman's terms is like a fingerprint for a
17 photograph or an image. All of the images that were uploaded
18 to the glepa2001 Yahoo account had a MD5 hash attached. That
19 came from the National Center for Missing and Exploited
20 Children. I ran those particular numbers, that hash value,
21 that MD5 hash on the rented computer and I did not find a
22 match.

23 Q. This hash check, is that the typical way that known
24 photographs are discovered or compared?

25 A. No, I usually don't run MD5 hashes. It was just a last

24

1 chance for this computer.

2 Q. And even that last chance was fruitless?

3 A. Yes.

4 Q. Now, what if anything did this lead you to believe, once
5 you finish your forensic exam, you don't find anything, what
6 conclusion do you arrive at at that point?

7 A. I honestly believed that this was not the computer the
8 Eberles used.

9 Q. And why did you believe that?

10 A. Because there was absolutely no evidence whatsoever
11 relating to the Eberles ever using this computer.

12 THE COURT: I didn't hear that last part?

13 THE WITNESS: I'm sorry, there was absolutely no
14 evidence linking the Eberles to actually using this computer.

15 BY MR. TRABOLD:

16 Q. In your experience did you expect, before you did the
17 exam, to be able to extract information relative to the
18 Eberles?

19 A. I would have expected to at least find a photo, if they
20 had taken a photo.

21 Q. You would have probably found this in the unallocated
22 space?

23 A. Correct.

24 Q. Now, you have the conclusion that this probably isn't
25 even the computer that the Eberles had rented. Did you go back

1 to the House of Television to inquire further or to further the
2 investigation relative to this first search warrant?

3 A. No, I did not.

4 Q. Why not?

5 A. I had other cases to work on. I did not want to go on a

6 fishing expedition to find the correct computer.

7 Q. You didn't have anything to really go on with this?

8 A. Absolutely not.

9 Q. Did you have any expectation that if you had gone back to

10 the House of Television, they would have been able to catch up

11 to the right computer?

12 A. No.

13 Q. Because they hadn't even given you the computer you

14 thought was right in the first place?

15 A. I didn't believe it was the correct one.

16 Q. Now, with that, the case lies dormant for a period of

17 time?

18 A. Yes.

19 Q. Primarily because you don't have any evidence of

20 anything?

21 A. Correct.

22 Q. And at this point in time when you determine there's

23 nothing on this computer that is of usefulness to you,

24 approximately how many other open cases or investigations or

25 things that are on your plate that you need to look at do you

26

1 have?

2 A. I couldn't even tell you a number.

3 Q. But more than a half a dozen?

4 A. Yes.

5 Q. Are you at this same time engaging in these undercover

6 investigations?

7 A. Not at that time. But I also worked with the child abuse

8 unit and investigate sexual and physical abuse as to other

9 computer crimes and other work in the District Attorney's

10 office, this was not my sole case.

11 Q. So, in short, at this point in time you have enough cases

12 with evidence that you can work on?

13 A. That's correct.

14 Q. Now, the case lies dormant for a period of time and then

15 in March of 2005 something else occurs which causes you to

16 become back involved in this investigation?

17 A. Yes.

18 Q. And what is that?

19 A. I get a phone call from the Corry Police Department.

20 They have a victim stating that she was molested and raped by

21 the Eberles and also photographs were taken of her during that

22 time.

23 Q. And at the time you investigated the first half of your

24 investigation with the computer, you received from NCMEC and

25 Delaware County a series of pictures of a young girl?

27

1 A. Yes.

2 Q. By young I mean --

3 A. Eleven or 12.

4 Q. In those pictures is the young girl naked in some of the

5 pictures?

6 A. Yes.

7 Q. Is the girl engaging in sexually explicit conduct in at

8 least some of the pictures?

9 A. Some of the pictures.

10 Q. And at the time you did that investigation, the child

11 that's depicted in the series of pictures that you received,

12 which were on Mr. Eberle's Yahoo account, that child was

13 unknown?

14 A. It was unknown, yes.

15 Q. So now in March of '05, you get information from a minor

16 female that she's been assaulted by the Eberles?

17 A. Yes.

18 Q. And pictures taken?

19 A. Yes.

20 Q. What do you then do to follow-up this investigation?

21 A. Well, she said that this happened a couple years prior to

22 the time that we got the phone call, which was March of 2005.

23 So to put it in the approximate timeframe of the original

24 photos being uploaded to Yahoo. So we have the victim come

25 into the Children's Advocacy Center to have a forensic

28

1 interview.

2 Q. When you say a forensic interview, what is your

3 understanding of what that means?

4 A. It's a trained professional will speak with the victim.

5 Q. What is the training designed to do or to prevent?

6 A. To prevent any type of leading or any type of bias

7 questions.

8 Q. And so the victim that reported to the Corry Police

9 Department the assault by these two defendants is forensically

10 interviewed?

11 A. Yes.

12 Q. Do you participate in that interview or at least witness

13 it?

14 A. I witnessed it.

15 Q. Explain, just so the judge is clear, what are the

16 surroundings or the circumstances of how you would witness an

17 interview without taking part in it?

18 A. Sure. There's a room with two chairs. One's a sofa,

19 one's a chair, sitting across from each other, the forensic

20 interviewer will sit in one and the child will sit in the

21 other. There's an observation room with a one-way mirror. I'm

22 sorry, a two-way mirror, I'm sorry. Then we sit in the other

23 room so we can watch the interview going on. There's also a

24 videotape and a microphone that we can hear.

25 Q. So you can be in one room watching the whole interview?

1 A. Yes.

2 Q. Is the interview videotaped or recorded?

3 A. Yes.

4 Q. And without going into the lengthy sum and substance of

5 the interview, does the victim, when forensically interviewed

6 at the Children's Advocacy Center, implicate these two

7 defendants in an assault on her?

8 A. Yes.

9 Q. And separate and apart from the assault, at some point

10 during the interview is the victim shown the pictures that came

11 from the Cybertip line?

12 A. Not during the interview.

13 Q. At some point subsequent to the interview?

14 A. Yes, she talked in the interview about having pictures

15 taken of her and that the Eberles showed them to her on their

16 computer. After the interview was done, because that interview

17 was pretty much solely for the rape and molestation

18 allegations, my partner and I went into speak with her

19 separately in regards to the allegations of photographs.

20 Q. And the portion that relates to the photographs, was that

21 videotaped?

22 A. No, it was not.

23 Q. Why?

24 A. Don't know the answer, I don't know.

25 Q. So the videotaped portion of the interview concludes, was

30

1 there something that she said during the course of the
2 interview that caused you to go get the photographs and show
3 them to her?

4 A. Yes.

5 Q. What happens when you show the victim this series of
6 photographs?

7 A. Well, I spoke with her before I showed them to her. I
8 asked her, typically, 11 and 12-year-olds usually have a
9 favorite color or a favorite outfit or piece of jewelry that
10 they usually wear. I asked her if there was anything in
11 particular at that age that she always had on. And she said
12 that she always wore a necklace with a pendent and she always
13 wore a silver ring on her left hand.

14 Q. Is the girl that's depicted in those series of photos, is
15 it apparent that she has items of jewelry on?

16 A. Yes, the girl is wearing a necklace with a pendent and a

17 silver ring on her left hand.

18 Q. So beyond just saying that she was assaulted and that

19 pictures were taken of her, she provides some further

20 description of the way she looked when this incident occurred?

21 A. Yes, without even looking at the images.

22 Q. She talked about the jewelry items before you ever showed

23 her the images?

24 A. Yes.

25 Q. With that then do you show the victim the series of

31

1 images that come from the Cybertip?

2 A. Yes, I did.

3 Q. What if anything does she say and how does she react?

4 A. Her reaction was immediate that that was her, those are

5 pictures that they took of her. She said that was my pendent.

6 Q. Beyond the jewelry, does she say anything else about any

7 item of clothing or underwear that she might have had on?

8 A. She said it looked like the bra that she had.

9 Q. What was her demeanor like when she revealed this

10 information?

11 A. She was very shook up, very scared, was her immediate
12 reaction, teared up, starting crying.

13 Q. And at the time you interviewed Tiffany Smith, the
14 victim, and the forensic interview occurred, how old,
15 approximately, would she have been?

16 A. During the interview?

17 Q. Yes, when you interviewed her?

18 A. Fourteen or fifteen.

19 Q. And the assault would have occurred when she was 12 or
20 13?

21 A. Roughly, yes.

22 Q. Now, separate and apart from that information being
23 provided to you from the victim, does the victim also indicate
24 that she engaged in a three-way conversation with these
25 defendants?

32

1 A. Yes.

2 Q. And did that occur in March of '05?

3 A. Yes.

4 Q. And what does she say about -- explain to the judge the

5 circumstances of this three-way conversation?

6 A. The three-way conversation consisted of -- in a previous

7 allegation of the rape and the molestation, Tiffany said that

8 the Eberles videotaped it. And in addition to that, the

9 pictures that were, she claimed were taken of her. The

10 three-way conversation discussed doing that again, taking

11 another videotape of a three-way between them.

12 Q. Let's take this one step at a time. Does the victim

13 indicate that she informed her mother of the assault?

14 A. Yes.

15 Q. And how does she characterize her mother's reaction?

16 A. Her mother didn't believe her.

17 Q. Okay. And based on her mother's reaction, does she say

18 anything to her mother?

19 A. Yes, she says I'm going to prove it to you.

20 Q. How does she do that?

21 A. She does a three-way call.

22 Q. Between who?

23 A. Between her mother and Alesha.

24 Q. The phone call is set up by who?

25 A. By Tiffany.

1 Q. The victim sets up the phone call, she calls Alesha

2 Eberle, one of the defendants?

3 A. From what she said, yes.

4 Q. And, again, this is information that you received from

5 the victim?

6 A. Correct.

7 Q. And the victim says she called Alesha Eberle, and is

8 anyone else on the phone?

9 A. Her mom.

10 Q. And is her mom on the phone in a circumstance where

11 Alesha would have known her mom was on the phone?

12 A. Tiffany said Alesha did not know.

13 Q. And what did they discuss while mom is listening in on

14 the phone call?

15 A. The videotape that had occurred a couple years ago.

16 Q. What if anything does the victim reveal about what Ms.

17 Eberle said during the course of that phone call?

18 A. That the videotape was destroyed somehow, they wanted to

19 make another one.

20 Q. They wanted to make another one, meaning who?

21 A. The Eberles, with Tiffany.

22 Q. George and Alesha indicated on the phone call they wanted

23 to make another video with the victim?

24 A. According to the victim, yes.

25 Q. Does the victim indicate that Mr. Eberle gets on the

34

1 phone?

2 A. Yes.

3 Q. What if anything does the victim say Mr. Eberle said

4 during the course of the phone call?

5 A. I don't remember that. I just remember she said that

6 George did get on.

7 Q. Now, after this forensic interview occurs and then you

8 discuss these photographs with the victim that are the subject

9 of the Cybertip, what do you then do, if anything, with regard

10 to this investigation?

11 A. Well, she said that there was a current computer and a

12 web cam at their house.

13 Q. Did she reveal how she knew that?

14 A. She was there.

15 Q. And at that point in time were you aware that the victim
16 and Mrs. Eberle had been in Internet contact?

17 A. At that time, no.

18 Q. So based on her information that they had a computer in
19 their residence at the time of the forensic interview, what if
20 anything do you do?

21 A. We draft a search warrant.

22 Q. What were you seeking to find in the search warrant?

23 A. Any and all portable media, storage devices, such as
24 USB's, floppies, CD's, portable hard drives, computer, web cam,
25 digital cameras and other videotapes.

35

1 Q. Now, with this second search warrant, you were seeking
2 the computer and all of these other media that you just
3 described?

4 A. Yes.

5 Q. With the first search warrant, were you just seeking the
6 computer?

7 A. Yes.

8 Q. Why in the second search warrant would you seek media or
9 storage devices beyond just their computer?

10 A. When Tiffany said that there was another web cam there, I
11 definitely wanted to grab the computer for that part. She also
12 said that it was videotaped on VHS. So I wanted to look for
13 the VHS. And other means, such as digital cameras or
14 recorders. I also wanted to look for floppies, USB's and
15 DVD's, because you could also store images on there, such as
16 the images that were taken and uploaded to Yahoo. Generally,
17 people who rent computers or upgrade computers will save them
18 on those portable media devices so they always have it
19 accessible to their new computer.

20 Q. So oftentimes in your experience the upgrade of a
21 computer means you put your old information on CD's or other
22 devices, and that's how you transfer it to your new computer?

23 A. Yes.

24 Q. And you then obtained the Eberle's computer and some
25 other equipment?

1 A. Yes.

2 Q. Did you conduct a forensic exam on that computer?

3 A. Yes, I did.

4 Q. Did you find a quantity of child pornography on the

5 computer?

6 A. Yes, I did.

7 Q. Separate and apart from the child pornography that you

8 found, did you find items on the computer that clearly linked

9 the computer to the Eberles?

10 A. Yes, I found numerous chats. I found other pictures of

11 George and Alesha and their kids.

12 Q. And this second search would have occurred in late March

13 of 2005?

14 A. Correct.

15 MR. TRABOLD: Nothing further, your Honor.

16 MR. PATTON: All right, Mr. Patton.

17 CROSS-EXAMINATION

18 BY MR. PATTON:

19 Q. Ms. Lynn, what specific training have you received to do

20 a forensic examination of computers?

21 A. I've received forensic training from Access Data. I've

22 received training from Internet Crimes.

23 Q. Access Data would be the company that manufactures

24 forensic software called Forensic Tool Kit?

25 A. That's correct.

37

1 Q. And is Forensic Tool Kit the forensic software program

2 that you use in your forensic evaluations of computers?

3 A. Yes.

4 Q. And you say you've had 300 hours of instructions on how

5 to do forensic evaluations?

6 A. I would estimate close to 300. Dating back to February

7 of 2003, when I started receiving training and also hands-on.

8 Q. The 300 hours includes the hands-on time --

9 A. As an estimate, yeah.

10 Q. When you received the tip from Delaware County regarding

11 these Yahoo pictures and after you tracked it down to George

12 Eberle and tracked down the fact that he had a computer, you

13 wanted to try and get that computer to look at it, correct?

14 A. That's correct.

15 Q. While you were preparing -- the information from NCMEC

16 established that the photos were uploaded to the Yahoo account

17 on September 2, 2001, correct?

18 A. If that's the date that's on the paper, yes.

19 Q. When you get the Cybertip from Delaware County, you're

20 now into August of 2004, correct?

21 A. That's when it was reported to Delaware County.

22 Q. And then Delaware County contacts you, correct?

23 A. That's correct.

24 Q. So we're roughly three years past the time these photos

25 were put up on the Yahoo server, correct?

38

1 A. Yes, that's when Yahoo notified NCMEC, the date is on the

2 paper.

3 Q. Well, let's not confuse things. Yahoo contacts NCMEC

4 sometime in August of 2004?

5 A. That's correct.

6 Q. With Yahoo saying we have found these images on our

7 server and we think they may be child pornography?

8 A. That's correct.

9 Q. The information Delaware County gets from Yahoo regarding

10 when the images were put onto Yahoo's server, was that the

11 images were placed on Yahoo's server on September 2nd of 2001,

12 correct?

13 A. That's correct?

14 Q. So in August of 2004 you want to try and get a search

15 warrant for George Eberle's computer to try and find these

16 images of suspected child pornography that had been placed onto

17 George Eberle's Yahoo my photos account?

18 A. Or any other child pornography, yes.

19 Q. Well, what probable cause did you have to believe that

20 there would be some child pornography, other than the Yahoo

21 photos, on Mr. Eberle's computer?

22 A. People who generally have child pornography just don't

23 have one image.

24 Q. How many, do they have a lot?

25 A. Some do, yes.

39

1 Q. And your understanding and experience would be that if

2 someone used their computer to collect, store, trade child

3 pornography, would most likely have a large number of images of

4 child pornography on their computer?

5 A. Most likely, yes.

6 Q. And they would want to keep these images on their hard
7 drive?

8 A. Or on a portable storage media device.

9 Q. So that they could keep them for long terms for either
10 trading or sexual gratification or lowering the inhibitions of
11 other children?

12 A. Yes.

13 Q. And they would not likely intentionally get rid of those
14 images?

15 A. Not likely.

16 Q. You learned from the caseworker with the Office of
17 Children and Youth Services that Mr. Eberle has a computer in
18 his house, correct?

19 A. Correct.

20 Q. You start working on a search warrant application to get
21 that computer, correct?

22 A. Correct.

23 Q. And in that search warrant affidavit you explain that
24 people who collect child pornography generally keep it and
25 don't intentionally delete it, correct?

1 A. That's correct.

2 Q. You also state, however, that even if they do delete it

3 for fear of being detected through the use of a forensic

4 software program, you can recover the deleted files?

5 A. Yes.

6 Q. And you then also say that even if someone gets a new

7 computer, someone who is storing child pornography on their

8 computer gets a new computer, most likely that person will save

9 the children pornography from the old computer before they get

10 rid of it, and then once they get the new computer, put the

11 images of child pornography onto the hard drive of their new

12 computer?

13 A. Yes.

14 Q. As you were preparing the search warrant to get the

15 computer from George Eberle's house, you find out through the

16 caseworker that the computer is no longer in George Eberle's

17 possession, correct?

18 A. That's correct.

19 Q. And that it's been returned to the rental store and

20 you're told the rental store is the House of Television in

21 Corry?

22 A. Yes.

23 Q. So you then contacted the House of Television in Corry,

24 correct?

25 A. Yes.

41

1 Q. To look at that computer?

2 A. For me to get the computer.

3 Q. Because at this point you feel you have probable cause to

4 believe that there is child pornography on that hard drive?

5 A. Possibly, yes.

6 Q. Well, you think you have probable cause to believe that

7 there is child pornography on the hard drive?

8 A. Yes.

9 Q. The person from the House of Television that you talk to,

10 do you know who you spoke to?

11 A. It's in my report, I believe his name was Craig.

12 Q. Craig Culhane?

13 A. Yes.

14 Q. Who's the manager of the House of Television?

15 A. Yes.

16 Q. And you told Mr. Culhane that you wanted to get the
17 computer that had just been turned back in by George Eberle,
18 correct?

19 A. Yes, but it had not just been turned back in.

20 Q. Well, you wanted the computer that had been returned by
21 George Eberle?

22 A. Yes, I believe it was actually taken by the House of
23 Television, but yes, the computer that the Eberles had used.

24 Q. Mr. Culhane told you that the Eberles had either turned
25 the computer back in or it had been taken by the House of

42

1 Television on or about August 20, 2004?

2 A. That's correct.

3 Q. And you spoke with Mr. Culhane on September 3rd of 2004?

4 A. Yes.

5 Q. Mr. Culhane told you that the computer had been
6 re-rented?

7 A. Yes.

8 Q. And he told you that before it had been re-rented, it had

9 been reformatted to be re-rented, correct?

10 A. Yes.

11 Q. Now, when you get this information, does that lead you to

12 believe that there's now no way you could try and get any

13 information off the computer relative to George Eberle?

14 A. No, not no way.

15 Q. Because you know how to use forensic software, correct?

16 A. Correct.

17 Q. So it is accurate to say that when information is deleted

18 from a hard drive, it doesn't mean the information is

19 physically removed from the hard drive?

20 A. Right, when it's deleted from the accessible area of

21 allocated space, it's put in into unallocated space. And then

22 it has the chance to be overwritten and essentially deleted.

23 Q. When it goes into unallocated space, from allocated space

24 to unallocated space, physically the file on the hard drive is

25 not moved, correct?

1 A. Correct.

2 Q. All that's happening is the operating system is being

3 told you don't have to worry about keeping the data stored at

4 this location on the hard drive anymore?

5 A. Yes.

6 Q. So the computer can at some point use that space again?

7 A. Yes.

8 Q. But if it doesn't use that space again, that data is

9 still sitting on the hard drive the same way it was sitting

10 when it was saved on the computer?

11 A. Until it's overwritten, yes.

12 Q. Then you knew all this information when you were speaking

13 with Mr. Culhane, correct?

14 A. Correct.

15 Q. So that's why you believed that even though the computer

16 had been -- some procedures had been done by the House of

17 Television to prepare the computer for re-renting, you believed

18 you could still find evidence of the pictures being on the hard

19 drive?

20 A. Yes.

21 Q. Because, again, it was your belief that these images from

22 Yahoo were somewhere on that hard drive in the unallocated

23 space?

24 A. Yes.

25 Q. And Mr. Culhane agreed to get you the computer so you

44

1 could come and pick it up, is that correct?

2 A. That's correct.

3 Q. And you went to the House of Television and Mr. Culhane

4 turned the computer over to you, correct?

5 A. Yes.

6 Q. And Mr. Culhane said this is the computer that the

7 Eberles had or words to that effect?

8 A. I'm pretty sure it was Mr. Culhane, yes.

9 Q. And you had made it clear to him which particular

10 computer you wanted, correct?

11 A. Yes.

12 Q. And he then provided that computer to you?

13 A. Yes.

14 Q. You then do a forensic evaluation of that computer?

15 A. Yes.

16 Q. You picked up the computer I believe on September 4,

17 2004, correct?

18 A. Yes.

19 Q. Did you discuss with Mr. Culhane or whoever was at the
20 House of Television when you picked up the computer, about the
21 new owner and how long the new owner had it?

22 A. No, I just knew that it was returned August 20th of 2004
23 and that it had been re-rented.

24 Q. Do you know when it had been re-rented?

25 A. No.

45

1 Q. Did you ask when it had been re-rented?

2 A. No, he just said it was re-rented.

3 Q. So you did not know the length of time that the new user
4 had been using the computer?

5 A. No.

6 Q. For your forensic evaluation, you did what is called data
7 carving of the unallocated space, correct?

8 A. Correct.

9 Q. Data carving is telling the forensic software program to
10 go into the unallocated space and you can ask the program to
11 look for particular types of files, correct?

12 A. Correct.

13 Q. One particular type of file is called JPEGs, correct?

14 A. Correct.

15 Q. JPEGs are digital images, correct?

16 A. Correct.

17 Q. Generally speaking, anyone who has a digital photo and

18 puts it on their computer, the computer is going to refer to

19 that photo as a JPEG file, correct?

20 A. Most likely, yes.

21 Q. That's based on the fact the extension of the file is

22 JPG, correct?

23 A. Or JPEG.

24 Q. So when you tell the forensic software program do a data

25 carving of the unallocated space for JPEGs, you're looking for

46

1 any images that are in the unallocated space on that hard

2 drive, correct?

3 A. Correct.

4 Q. You did that in this case with the computer you got from

5 the House of Television?

6 A. Yes.

7 Q. And you found JPEG images in unallocated space?

8 A. Yes.

9 Q. You reviewed all those images?

10 A. Yes.

11 Q. How many did you find?

12 A. I don't know.

13 Q. Well, Forensic Tool Kit allows you to create reports

14 regarding the information that's found during the searches,

15 correct?

16 A. Yes, I didn't do a report on this because I didn't find

17 anything relevant to the case.

18 Q. Forensic Tool Kit, it has built into the program that you

19 can, and the program does a lot of this for you, says put all

20 the JPEGs that we found, put it in a report and print out for

21 me, you can do that with Forensic Tool Kit?

22 A. No, you have to individually select each image in order

23 for it to be exported out for the report, I didn't select any

24 images.

25 Q. Forensic Tool Kit will show you all the JPEGs it has

1 carved out of unallocated space, correct?

2 A. Looking at them, yes.

3 Q. And then you can select them if you want to or bookmark

4 them?

5 A. Or flag them, yes.

6 Q. And then Forensic Tool Kit can generate a report that

7 contains those images and whatever information that comes along

8 with those images, correct?

9 A. Correct.

10 Q. So you looked through all the JPEG images, there were

11 thousands of JPEG images?

12 A. I don't recall how many.

13 Q. And these are JPEG images that are coming from

14 unallocated space, correct?

15 A. Correct, the ones that were data correct.

16 Q. And these aren't ones that we're talking about the new

17 user put on and they're in the new user's my photos file?

18 A. No, but the new user could have deleted them and put them

19 in unallocated space. Like I said earlier, the dates and times

20 aren't there in unallocated space.

21 Q. You didn't find any of the 13 images that Yahoo had

22 turned over to NCMEC that were the suspected child pornography,

23 correct?

24 A. That is correct.

25 Q. And you specifically looked for any or all of those

48

1 images?

2 A. Yes.

3 Q. In addition to looking for any child pornography?

4 A. Or anything relating to the Eberles. Like I said, I was

5 looking for pictures. I know they had the web cam when they

6 had children at the house, I was looking for anything to link

7 them to using this computer.

8 Q. Well, even though you didn't have Forensic Tool Kit to

9 create a report of your forensic evaluation, you wrote a report

10 concerning your evaluation, your forensic evaluation of the

11 computer that you got from House of Television, correct?

12 A. Yes, I wrote that I didn't find any pictures.

13 Q. That report, the purpose of that report was to document

14 what you had done, correct?

15 A. Correct.

16 Q. And what you had found?

17 A. Yes.

18 Q. Correct?

19 A. Yes.

20 Q. Do you see on your screen there, does that appear to be a
21 portion of your report?

22 A. Yes.

23 Q. Do you see where it's dated 9/28/2004?

24 A. Yes.

25 Q. That is the report you wrote detailing your forensic

49

1 evaluation of the computer you received from the House of

2 Television, correct?

3 A. Yes.

4 Q. Could you highlight for me, if you could, please, where

5 you state that you did searches on the hard drive to look for

6 anything linking the computer to the Eberles?

7 A. I did not put that in the report.

8 Q. Excuse me, what?

9 A. I did not put that in the report.

10 Q. You did not put in your report that you did any type of

11 searching to try and find information that would link the

12 computer to the Eberles?

13 A. No, I did not.

14 Q. The report states, but it does detail the data carving

15 that you did, correct?

16 A. Yes.

17 Q. Looking for HTML sites -- HTML sites are basically web

18 pages, correct?

19 A. Yes.

20 Q. AOL lists, those would be if the computer is using

21 America Online as its Internet service provider, buddy lists,

22 things of that nature?

23 A. Yes, it was one of the options for data carving.

24 Q. And then for the JPEGs?

25 A. Yes.

1 Q. But there's no description in there of searching for

2 terms saying you searched for terms George or Alesha or Eberle,

3 is there?

4 A. No.

5 Q. There's nothing in there saying that I ran a search for

6 glepa2001, is there?

7 A. No.

8 Q. And, of course, the computer you had been given, the

9 House of Television said look, this is the computer the Eberles

10 had used, correct?

11 A. Yes.

12 Q. And so what you're really looking for on that computer

13 was trying to find any images of child pornography, correct?

14 A. Yes.

15 Q. And if you found images of children pornography, then you

16 would be trying to charge George or Alesha Eberle with

17 receiving or possessing that child pornography?

18 A. If they were the images that were uploaded.

19 Q. If you found those images on that hard drive, it was your

20 intention to present the case to the District Attorney's office

21 to try and prosecute it?

22 A. Yes.

23 Q. And imagine for a moment that you had found one of those

24 13 images on the computer's hard drive, okay?

25 A. Okay.

1 Q. Also imagine for a moment that you didn't find the words
2 George or Alesha or Eberle or anything on the hard drive
3 linking the computer to the Eberles. You would still have
4 presented the case to the District Attorney's office to
5 prosecute George Eberle for possessing those images, correct?

6 A. I would have sat with an attorney and discussed it.

7 Q. Because these links are like business records from the
8 House of Television that can establish who has a particular
9 computer during a particular date, correct?

10 A. Yes.

11 Q. And so you can link the computer to the Eberles through
12 the House of Television and the House of Television's rental
13 records showing who had rented this particular computer,
14 correct?

15 A. Yes.

16 Q. Then not only did you not find any of the 13 images that
17 were from Yahoo, you found no images of child pornography
18 whatsoever anywhere on the hard drive?

19 A. That's correct.

20 Q. Now, you testified today that you honestly believed you

21 had the wrong computer from the House of Television?

22 A. Yes.

23 Q. That's your testimony. Show me in your report on the

24 September 28, 2004 entry, where you put in your report that you

25 don't think you have the computer that was used by George

52

1 Eberle?

2 A. I didn't.

3 Q. You never called the House of Television to say hey, I

4 think you might have given me the wrong computer?

5 A. No.

6 Q. You never went to the House of Television to speak with

7 them to say look, I asked for the Eberle's computer, I don't

8 think you gave me the Eberle's computer?

9 A. That's correct.

10 Q. So you think you had probable cause to believe that the

11 computer George Eberle rented from the House of Television had

12 child pornography on the hard drive -- when you then believe,

13 develop to believe that the computer that the House of

14 Television gave you wasn't George's computer, you said the heck
15 with it, I'm done with it, I'm too busy, I got other things to
16 do?

17 A. Since I didn't find anything on there, yes.

18 Q. Well, but you still believed at this point, according to
19 your testimony today, you thought you didn't have the Eberle's
20 computer, right?

21 A. Possibly, yes.

22 Q. If you didn't have the Eberle's computer, you still
23 believed you had probable cause to believe that whatever
24 computer George Eberle had possessed, that he had rented from
25 the House of Television, had these images of child pornography

53

1 from the Yahoo account on the hard drive, correct?

2 A. Correct.

3 Q. And so you still believe that there is some computer in
4 the inventory of the House of Television that has child
5 pornography on it and you take absolutely no steps whatsoever
6 to try and locate that computer?

7 A. That is correct. Possibly with the timeframe, the

8 evidence may not be there.

9 Q. But you already established that in your forensic skills

10 you still believe there's probable cause to believe that the

11 images of child pornography that Yahoo had identified were on

12 whichever computer George Eberle had rented from the House of

13 Television, correct?

14 A. Correct.

15 Q. And you still believe that after you did your forensic

16 evaluation of the computer that the House of Television gave

17 you?

18 A. I believe it could have been stored on a portable storage

19 device.

20 Q. But, ma'am, you said that every hard drive that Mr.

21 Eberle would have, after he already has these images of child

22 pornography on his hard drive back in August or September of

23 2001, when they get uploaded, every computer he then has from

24 that point on is going to have these images of child

25 pornography on the hard drive, correct?

1 A. No, not unless he put it there.

2 Q. Did you not put in your affidavit that they would be on
3 the hard drive, they would save it on the hard drive --

4 THE COURT: Just for the record, there's two
5 affidavits.

6 BY MR. PATTON:

7 Q. You put it in both of your affidavits, for both search
8 warrants, that someone had the child porn on the hard drive of
9 a computer, they got rid of that computer and got a new
10 computer, they would store the child porn from their first
11 computer on some kind of storage media, and when they got their
12 new computer, they would put the images of child pornography
13 that they had stored on the storage media onto the hard drive
14 of their new computer, correct?

15 A. Correct.

16 Q. Because when you got the search warrant for the Eberle's
17 computer from the House of Television, you weren't getting any
18 other storage media or anything from George Eberle, correct?

19 A. That's correct.

20 Q. You were saying you had probable cause to believe that on
21 the hard drive of that computer, that images of child
22 pornography from Yahoo would be found?

23 A. Yes.

24 Q. You didn't find them on the computer that the House of

25 Television gave you saying -- with the House of Television

55

1 saying here's the Eberle's computer?

2 A. That's correct.

3 Q. So you didn't draw the conclusion that hey, you know

4 what, maybe I was just wrong, maybe George Eberle's computer

5 doesn't have child pornography on the hard drive?

6 A. No.

7 Q. You didn't reach that conclusion?

8 A. No.

9 Q. Why not?

10 A. Because I believe that possibly it wasn't the right one.

11 Also, like I said, they could have portable storage media

12 devices. They don't rent thumb drives or CD's.

13 Q. Assume that George Eberle had had child pornography on

14 the hard drive of the computer he rented from the House of

15 Television, but before he took it back to the House of

16 Television he stored the child pornography on some kind of

17 storage device, a CD, whatever, and then deleted it from the
18 hard drive, then turned it back into the House of Television,
19 with your forensic examination skills, you would still believe
20 there was probable cause those images would still be on the
21 hard drive, correct?
22 A. If they were put on the hard drive, yes.
23 Q. To get transferred from a hard drive to a storage media,
24 the images would have to be on the hard drive first, correct?
25 A. No, not essentially. You can just save a picture and

56

1 place it right on to your thumb drive through the USB port.
2 Q. We're talking about pictures that were -- you said that
3 you believed were on their hard drive, correct?
4 A. Yes.
5 Q. And you were getting a search warrant for George Eberle's
6 computer, correct?
7 A. Correct.
8 Q. You weren't getting -- I'm talking about the first search
9 warrant you got here for the House of Television's computer.
10 That search warrant wasn't for any storage media or anything

11 like that, correct?

12 A. Right.

13 Q. That was a search warrant for the computer George Eberle

14 had rented because you were saying you had probable cause to

15 believe that on the hard drive of that computer you would find

16 these images of child pornography turned over by Yahoo,

17 correct?

18 A. Correct.

19 Q. I'm not trying to trick you.

20 A. I'm trying to follow you.

21 Q. You got a search warrant for the computer George Eberle

22 rented from the House of Television?

23 A. Right, and that search warrant, I believe, if I could

24 look at the front page, did ask for any and all portable

25 storage devices.

57

1 Q. I'm showing you Defendant's Exhibit A, this is the same

2 Defendant's A that's attached to the motion -- all right. The

3 search warrant that you're looking at right now, is the search

4 warrant for the computer from the House of Television, correct?

5 A. Yes.

6 Q. When you initially wrote that search warrant out, you
7 originally were intending on having the place to be searched to
8 be George Eberle's home, correct?

9 A. That is correct.

10 Q. Because at the time you were physically writing it, you
11 thought the computer was still at George's house, right?

12 A. That is correct.

13 Q. You actually had the warrant done up and ready to go for
14 George's house when you found out the computer had been taken
15 back to the House of Television, correct?

16 A. That is correct.

17 Q. When you got the information back that the computer had
18 been returned to the House of Television, you changed the place
19 to be searched on the warrant, correct?

20 A. Yes, that's correct.

21 Q. And so the items to be searched for does list computers
22 and storage media and things of that nature, correct?

23 A. Yes.

24 Q. But that was written in there when you were writing the
25 search warrant in anticipating searching George's home,

1 correct?

2 A. Yes.

3 Q. You didn't have any reason to believe that when George

4 Eberle turned the computer back into the House of Television,

5 George also took down his collection of child porn that he had

6 stored on the CD and given to the House of Television, did you?

7 A. No, I don't think so.

8 Q. You didn't have any probable cause to believe that at the

9 House of Television you were going to find any of George

10 Eberle's electronic storage media, other than the hard drive of

11 the computer that he had rented from them, correct?

12 A. Correct.

13 Q. With regards to that search warrant as it related to

14 searching the House of Television for the computer rented by

15 George Eberle, your probable cause was that there was probable

16 cause to believe that the hard drive of that computer would

17 contain these 13 images of child pornography Yahoo had found on

18 its server, correct?

19 A. Yes, if he had put it there.

20 Q. You said you had probable cause to believe that he had

21 put it there, that it was on there, correct?

22 A. Correct.

23 Q. That's the whole way that you establish probable cause to

24 believe it was on the hard drive by saying it would be on every

25 hard drive of every computer that he owned because he would

59

1 save it to the storage media -- to some storage media, he would

2 also then put it back onto the hard drive of any new computer

3 he got?

4 A. Right.

5 Q. And also in the affidavit in support of that search

6 warrant, you put in there that the computer had been returned

7 to the House of Television, correct?

8 A. Yes.

9 Q. And you put in there that you had talked with Mr. Culhane

10 from the House of Television who had confirmed that that

11 computer that had been rented by George Eberle was there?

12 A. Yes.

13 Q. And could you read that portion?

14 A. Sure. "This officer spoke with manager Craig Culhane of

15 the House of Television rental and their possession of a Hewett

16 Packard previously rented by George Eberle."

17 Q. Your sworn affidavit to the district justice, you're

18 putting in there you talked with the people from the House of

19 Television and they, the House of Television, have the specific

20 computer that had been rented by George Eberle, correct?

21 A. Yes, I spoke with them on the 3rd and told them I was

22 going to be getting a search warrant for him.

23 Q. You assured the judge in your affidavit that the computer

24 you were getting from the House of Television was the computer

25 that George Eberle had rented from the House of Television?

60

1 A. That's what I was told, yes.

2 THE COURT: We're going to take a five-minute

3 recess.

4 (Recess from 10:20 a.m.; until 10:30 a.m.)

5 THE COURT: All right, Mr. Patton.

6 BY MR. PATTON:

7 Q. Detective Lynn, can we agree that in the affidavit you

8 wrote in support of the search warrant to get the computer from

9 the House of Television, your affidavit states that you have
10 probable cause to believe that on the hard drive of that
11 computer would be found the 13 images that Yahoo turned over to
12 NCMEC?

13 A. Yes.

14 Q. Can we agree that your forensic evaluation of that
15 computer showed that those images were not on that hard drive?

16 A. That's correct.

17 Q. Can we agree that there were no images of child
18 pornography on that hard drive?

19 A. Correct.

20 Q. And if that computer really had been the one that the
21 Eberles used, then the reasonable conclusion to draw from those
22 facts would be that in reality those 13 images had never been
23 on the hard drive of George's computer, correct?

24 A. Can you repeat.

25 Q. If you really did get from the House of Television the

1 computer that George Eberle had rented from them that had been
2 returned to the House of Television, the reasonable conclusion

3 to be drawn from your forensic evaluation of that computer

4 would be that the images, the 13 images from Yahoo, had never

5 been on the hard drive of that computer?

6 A. Could possibly.

7 Q. Well, that is the reasonable conclusion to be drawn given

8 the forensic evaluation you did of the computer, correct?

9 A. Given the other circumstances, yes.

10 Q. What other circumstances?

11 A. Like I stated, I didn't find anything relating the

12 Eberles to that, use of the computer.

13 Q. But my question is if you assume that was the Eberle's

14 computer, I under understand that's not the conclusion you

15 drew?

16 A. Correct.

17 MR. TRABOLD: I'm going to object, what's the

18 relevance, we're here to talk about the computer that she

19 examined and what her conclusion was. Not hypotheticals about

20 whether if in fact this was really the Eberle's computer

21 because that's not relevant to our determination.

22 THE COURT: It's overruled, go ahead. Last time

23 through, then go on.

24 BY MR. PATTON:

25 Q. If in fact the computer you received from the House of

62

1 Television was the computer that had been rented by them to

2 George Eberle, the reasonable conclusion to be drawn from your

3 forensic evaluation of that computer was that the 13 images of

4 suspected child pornography that Yahoo identified had not been

5 on that hard drive?

6 A. Correct.

7 Q. And, indeed, no images of child pornography had ever been

8 on the hard drive?

9 A. Correct.

10 Q. Now, you say you drew the conclusion that the House of

11 Television must have given you the wrong computer?

12 A. That's a possibility.

13 Q. But you never then followed up with the House of

14 Television to try and ask them to find the real computer,

15 correct?

16 A. That's correct.

17 Q. Or you never went back to the House of Television to

18 actually confirm that you had in fact been given the correct

19 computer?

20 A. That's correct.

21 Q. Because you simply had too many other things on your

22 plate?

23 A. Given other investigations, yes.

24 Q. Do you really think it's hard to find child pornography

25 on the Internet?

63

1 A. If you know where to look no, it's not.

2 Q. Do you think it's difficult for anybody using the

3 Internet, just a standard Internet user, do you think it's hard

4 for them to find child pornography?

5 A. I think you have to actively search for it, you can't

6 just put child pornography in Google and do search.

7 Q. If you're interested in finding child pornography on the

8 Internet, your purpose is to get on the Internet and try and

9 find child pornography, your opinion is it's difficult to find

10 that?

11 A. If you're interested in looking for it, you're going to

12 search a little bit to find it. It's not like adult

13 pornography where you can get a pop-up immediately or when you

14 do a search. You have to actively search for it.

15 Q. Are you aware that the Department of Justice is

16 subpoenaing Google for the search terms to put into Google,

17 trying to prove up that people often unintentionally get child

18 pornography in response to their search terms to argue that

19 federal law has to be allowed to regulate child pornography?

20 A. No.

21 Q. Let's move on to March of 2005. You become aware that

22 Tiffany Smith is making allegations that --

23 THE COURT: Did you say 2001?

24 MR. PATTON: I meant to say 2005. If I said 2001, I

25 meant March of 2005.

64

1 THE COURT: All right.

2 BY MR. PATTON:

3 Q. This is when you received information that Tiffany Smith

4 is saying that George and Alesha Eberle took photos of her

5 using their web cam, correct?

6 A. Correct.

7 Q. And that supposedly George had sex with her while Alesha
8 was videotaping?

9 A. I'd have to re-read the report to see exactly who was
10 doing what, but roughly.

11 Q. When you found -- well, you watched the forensic
12 interview, correct?

13 A. Correct.

14 Q. And in the forensic interview Tiffany says that this
15 happened when she was 12-years-old, just getting ready to turn
16 13, correct?

17 A. I don't recall exactly the age. I'd have to look and see
18 if I have it.

19 Q. But she also stated that this happened right before she
20 started 6th grade, do you recall that?

21 A. Like I said, I'd have to double check.

22 Q. Now you were sitting watching this as it happened,
23 correct?

24 A. Back in March, yes.

25 Q. As the interview was actually taking place, you are

1 watching it and listening to it in realtime?

2 A. Yes.

3 Q. Now, as you were sitting and watching that, did you have

4 the photos that Yahoo had turned over to NCMEC?

5 A. In my folder, yes.

6 Q. Had you met with Tiffany before the forensic interview?

7 A. I don't recall, no. Unless I said hi in the lobby, other

8 than that, no.

9 Q. You didn't interview her before the forensic interview?

10 A. No.

11 Q. But you had these photos from Yahoo with you?

12 A. Yes.

13 Q. Why did you have them with you?

14 A. Because we had the phone call from the Corry Police

15 Department, like I said, that they said they had a girl saying

16 that she was raped, molested, and had photos taken of her by

17 the Eberles. I had photos of a young girl that were found in

18 the Eberle's Yahoo account. So yes, I had them there.

19 Q. And I believe you explained that the purpose of the

20 forensic interview was to make sure that a trained interviewer

21 discussed with the alleged victim to try and prevent any type

22 of even unintentional misleading or misinformation being
23 developed?

24 A. Yes.

25 Q. And that's the whole point of doing the forensic

66

1 interview?

2 A. Yes.

3 Q. Why didn't you have the forensic interviewer show the
4 photographs to Tiffany?

5 A. Because at that time the forensic interviewer was only
6 trained on asking questions about rape and molestation. We had
7 a separate account, until she said it in the interview about
8 being photographed, we weren't going to mention it at all.

9 Q. Then why did you bring the photos with you?

10 A. In case she did state in the interview that she had
11 pictures taken of her, so we could ask her if she could tell us
12 anything she was wearing or any type of particular poses.

13 Q. After Tiffany said during the interview that the
14 photographing took place and explained that, did you then
15 decide I'm going to show her the photographs?

16 A. My partner and I did, yes.

17 Q. Well, at that point in time, why didn't you have the

18 forensic evaluator do that rather than you guys?

19 A. We decided we would do it.

20 Q. And you decided that you were going to do it without

21 having the videotape?

22 A. Yes, the videotape, we usually just videotape the

23 forensic interview. When the interviewer comes in, she does

24 all the stuff with the DVD player and the recorder, to shut it

25 off and finalize the CD.

67

1 Q. But you could have asked her to keep the videotape

2 rolling while you guys showed Tiffany the images, correct?

3 A. I could of, yes.

4 Q. The images that were from Yahoo, at least on some of the

5 images you see the face of the girl, correct?

6 A. Partial face.

7 Q. Some of them you see the whole face, correct?

8 A. I don't recall an actual full head shot.

9 Q. But you were able to look at Tiffany Smith, correct,

10 during the forensic evaluation?

11 A. Yes.

12 Q. You were able to look at her as you were preparing her to

13 look at the photos, correct?

14 A. Yes.

15 Q. And you had already seen the photos, correct?

16 A. Yes.

17 Q. Did you look at her and try to make a determination in

18 your mind as to whether or not you thought that these pictures

19 from Yahoo were pictures of this young lady who was standing

20 right in front of you?

21 A. It could be possible, but there was also four years in

22 between, people grow up, people change hair colors.

23 Q. So what did you say to her before you showed her the

24 photographs?

25 A. I asked her to describe to me about the images that were

1 taken. She said they were taken by a web cam and that she was

2 standing up and doing various poses. Sometimes she had a bra

3 on, sometimes she didn't. I asked her if at any particular

4 time, given her age, did she have a particular item on such as

5 necklaces, a baret, colors of clothing, anything she favored.

6 And she said that she always wore a necklace with a pendent and

7 she always wore a silver ring on her left hand.

8 Q. How did she describe the pendent, the necklace?

9 A. I believe she said it had something to do with a heart.

10 Q. It was a half heart, correct?

11 A. Could be.

12 Q. That she got from her sister?

13 A. Yes, she said she got it from her sister.

14 Q. And on the images from Yahoo, you can see somewhat the

15 pendent, correct?

16 A. Somewhat, it's very small.

17 Q. And it's circular, right?

18 A. I'd have to look at the picture.

19 Q. Did you bring the disk with the images?

20 A. No, I did not.

21 MR. PATTON: Judge, I have the disk with the images

22 on them, I will show them to the court later when I have a

23 witness on when we're going to have the computer running.

24 THE COURT: All right.

69

1 Q. From your review of what you could see on the photos from

2 Yahoo, you thought that was a pendent on that image?

3 A. I don't recall her specifically stating it was a heart.

4 Q. Well, I just asked you if she said it was a heart, you

5 said yes, it was a heart or a half heart, something she got

6 from her sister?

7 A. I know she got something from her sister, I don't believe

8 she actually stated to me that her pendent was a heart. May I

9 look at my report here.

10 Q. Sure.

11 THE COURT: When you get where you're going, let us

12 know what page number?

13 THE WITNESS: Sure. I don't have anywhere that she

14 said it was a heart.

15 BY MR. PATTON:

16 Q. So, now your testimony, is it accurate to say your

17 testimony is you don't remember if she said anything about what

18 kind of pendent it was?

- 19 A. Yeah, I don't have it in my report that she stated
- 20 anything about what type of pendent.
- 21 Q. You didn't ask her?
- 22 A. No. That is when we showed her the pictures.
- 23 Q. And when she looked at the photos, did you tell her
- 24 anything as she was looking at the photos, did you say anything
- 25 to her?

70

- 1 A. Asked her if she knew who it was and if she did, if she
- 2 could tell us who they were.
- 3 Q. And her response was?
- 4 A. She started crying and said that's me.
- 5 Q. Well, could you explain, if you could, what happened
- 6 between the time that the forensic evaluation was conducted,
- 7 which was, I believe, March 24th of 2005 -- do you want to
- 8 check your report to see if that's the correct date?
- 9 A. Of the forensic interview?
- 10 Q. Yes.
- 11 A. March 24th.
- 12 Q. 2005, correct?

13 A. Correct.

14 Q. That's the same date that you showed the photos to

15 Tiffany, correct?

16 A. Yes.

17 Q. What happened between March 24, 2005 and last week, that

18 allowed somebody to discover that these pictures weren't of

19 Tiffany?

20 A. Last week when we sat down with her, she stated that they

21 were not of her.

22 Q. You just sat down and she volunteered hey, I've been

23 thinking about it --

24 A. I wasn't in the room when it happened.

25 Q. After the forensic evaluation of March 24, 2005, you and

71

1 your partner prepare criminal complaints and arrest warrants

2 for George and Alesha Eberle, correct?

3 A. Correct.

4 Q. You charge them with a host of criminal offenses related

5 to the alleged molestation of Tiffany Smith, is that right?

6 A. That's right.

7 Q. You then went and executed the arrest warrants to George

8 and Alesha's residence, is that correct?

9 A. That's correct.

10 Q. And while you were doing that, you noticed that there was

11 a computer in that residence?

12 A. No, I knew there was a computer there prior to that.

13 Q. How did you know that?

14 A. Because Tiffany said there was. So in addition to the

15 arrest warrants, we had a search warrant.

16 Q. So you find out on March 24, 2005, that George and Alesha

17 now have a computer in their house?

18 A. Yes.

19 Q. And you want to try and get a search warrant for that

20 computer, correct?

21 A. Correct.

22 Q. To look for the images, the 13 images from Yahoo that

23 Tiffany says are her, correct?

24 A. Yes.

25 Q. That's the probable cause you put forth in the affidavit

1 in support of the search warrant that's prepared in March of

2 2005 --

3 A. Do you have the second warrant that I can look at please,

4 sir.

5 MR. PATTON: Judge, this would be Defendant's

6 Exhibit B as attached to the motion.

7 THE COURT: Attached to your motion?

8 MR. PATTON: Correct.

9 THE WITNESS: Thank you.

10 BY MR. PATTON:

11 Q. Your search warrant, after it establishes who you are and

12 your expertise, it starts talking about the information Tiffany

13 gave in the forensic evaluation, correct?

14 A. Correct.

15 Q. And to back up just a moment, is it accurate to say that

16 the first paragraph of your affidavit sets forth who you are

17 and how you're employed and the training that you have

18 received, is that correct?

19 A. Yes.

20 Q. States that you're a police officer employed as a county

21 detective in the Erie County District Attorney's office, and

22 that you are charged with the duties of investigating

23 violations of the Pennsylvania Crimes Code, that you received
24 specialized training in the investigation of computer related
25 criminal activity, is that correct?

73

1 A. Yes.

2 Q. It says in the past two years you have participated in
3 several executions of search warrants for computer stored
4 records and evidence, right?

5 A. Yes.

6 Q. Nowhere in that paragraph does it explain that you have
7 any training at all with regard to the sexual exploitation of
8 children, correct?

9 A. In that paragraph, no, it doesn't. Well, computer
10 related criminal activity, but it doesn't specifically state
11 sexual exploitation.

12 Q. It doesn't mention that you have any kind of specialized
13 training with regard to the activities of people interested in
14 child pornography, correct?

15 A. No. Like I said, it says computer related criminal
16 activity.

17 Q. Well, would it be accurate to say that someone can be
18 trained in computer-related investigations, for example, like
19 being able to do forensic type evaluations, but not also have
20 any type of training on child pornographers and the qualities
21 they exhibit; is that a fair statement?

22 A. Fair statement, yes.

23 Q. After you lay forth the information Tiffany provided
24 about the alleged photographs taken of her with the web cam and
25 George's alleged rape of her while Alesha videotaped it, you

74

1 discuss the information that you received through Delaware
2 County and NCMEC from Yahoo, correct?

3 A. Yes.

4 Q. Laying out that there are these images that Yahoo found
5 on their server, that Yahoo turned over to NCMEC, who then went
6 to Delaware County, who then directed it to you, correct?

7 A. Yes.

8 Q. Basically details the investigation you had previously
9 done in August and September of 2004, regarding tracking down
10 the Yahoo account to George Eberle, correct?

11 A. Yes.

12 Q. You talk about using the IP address in tracking that

13 through Internet service providers to find out that this

14 person, this glepa2001, was George Eberle, correct?

15 A. Correct.

16 Q. You then explain that Tiffany was shown the Yahoo photos

17 and said yes, that's me in the photos, correct?

18 A. Correct.

19 Q. You then give the information that was very similar, if

20 not virtually identical, as from the search warrant application

21 you had done for the House of Television computer about that

22 child pornographers keep their child pornography for a long

23 time and even if they don't keep the child pornography, through

24 forensic examinations you can recover that type of deleted

25 information, correct?

75

1 A. In addition to other stuff, yes.

2 Q. And you also put in information about how if someone has

3 child pornography stored on their computer, even if they get a

4 new computer, they'll save the child pornography on some type

5 of storage media before they get rid of their old computer, but
6 that when they get a new computer, they'll upload the child
7 pornography back onto the new computer?

8 A. Most likely, yes.

9 Q. Based on those facts, you had probable cause to believe
10 that the images from the Yahoo, that Yahoo found, these 13
11 images, were on the hard drive of the computer that was in the
12 Eberle's home, correct?

13 A. Correct.

14 Q. And also potentially on other storage media in the home?

15 A. Correct.

16 Q. But also specifically on the hard drive, the computer's
17 hard drive?

18 A. Correct.

19 Q. Because the search warrant asks for permission to search
20 the hard drive of the computer, correct?

21 A. Correct.

22 Q. Along with any other electronic storage media found in
23 the home?

24 A. That's correct, yes.

25 Q. So is it accurate to say that in the affidavit you did in

1 March of 2005, the premise for your statement in your affidavit
2 that there was probable cause to believe that the images from
3 Yahoo were on the hard drive of the computer in the Eberle's
4 house, went as follows. At some point in time these images
5 were on George and Alesha's hard drive. Because George and
6 Alesha are people that have an interest in child pornography,
7 they're very unlikely to delete those images. And even if they
8 do delete them, we can probably find them using forensic
9 software programs. And even if they've gotten new computers,
10 they would have stored these pictures before they got rid of
11 the old computer, and then put the pictures on the new computer
12 and that's why I believe there is probable cause to believe
13 that these images are on this hard drive three-and-a-half years
14 after they were uploaded to Yahoo?

15 A. Yes.

16 Q. And for that probable cause finding to be logically
17 correct, each computer George Eberle had from August or
18 September 2nd of 2001, when these images were uploaded to Yahoo
19 and if the images themselves were taken with a web cam hooked

20 up to the computer, every computer George had would have these

21 images of children pornography on them?

22 A. Most likely.

23 Q. And even if he got rid of the old ones and had gotten new

24 ones, the images would be put on the new computer?

25 A. If he had a lot of portable storage media device, he

77

1 could put it into the computer and put them on the computer

2 again, yes.

3 Q. I'm going to have you take a look at the screen for a

4 minute. This is page four of the affidavit.

5 A. I can't read anything on there. Can I just look at the

6 paper.

7 Q. Yes.

8 A. Okay.

9 Q. This is on page four of the affidavit, and we're in the

10 second paragraph, the paragraph that starts "based on this

11 officer's past experience and training," do you see that?

12 A. Yes.

13 Q. Six lines down, about the middle of the page starts with

14 the sentence "based on her past experience and training, this
15 affiant believes that persons who use personal computers in
16 their homes tend to retain their personal files and data for
17 extended periods of time even if a person has replaced, traded
18 in or upgraded to a new personal computer. This affiant
19 believes personal computer users routinely transfer most of
20 their data onto their new computers when making an upgrade.
21 This data transfer is often done by saving files from the old
22 computer to media sources (CD's or floppy disks, Zip drives,
23 USB port device), then opening them onto the new computer and
24 saving them to the new hard drive?"
25 A. Yes.

78

1 Q. That's what your affidavit states?
2 A. Yes.
3 Q. So your affidavit states that in your experience, in your
4 belief, if someone gets rid of their old computer, they save
5 all of the information that's on the hard drive of the old
6 computer and not just store it on storage media, but then put
7 it onto the hard drive of their new computer, correct?

8 A. Correct.

9 Q. And then you link with that information, your information

10 that child pornographers don't ever get rid of their collection

11 of child pornography, correct?

12 A. They're not likely to get rid of it, that's correct.

13 Q. Thereby making the assertion to the judge, it's unlikely

14 they would have gotten rid of this child pornography even if

15 they have gotten got new computers, what most likely happened

16 is they save their child pornography off the old computer and

17 put it on their new computer?

18 A. Yes.

19 Q. If you had one of these people's prior computers and had

20 searched their prior computer and it really was their computer

21 and found no child pornography whatsoever, then your basis for

22 probable cause in this search warrant affidavit would not hold

23 water, correct?

24 A. I would disagree.

25 Q. Why would you disagree?

1 A. Because like I said, I didn't find anything relating the

2 Eberles to using that computer.

3 Q. Okay. My question is -- we'll take the Eberle's case as
4 an example. If you really had the Eberle's computer from the
5 House of Television, then if that was really the evidence, your
6 basis for asking for establishing probable cause in this search
7 warrant affidavit would not be correct?

8 A. Well, there's always the possibility that the pictures
9 would have been overwritten.

10 Q. There's a possibility that pictures would have been
11 overwritten, okay. When we were discussing your forensic
12 evaluation of the computer you got from the House of
13 Television, we discussed what reasonable conclusion would be
14 drawn if you assumed that you did in fact have the Eberle's
15 computer, but you did not find any of the Yahoo images on that
16 computer and indeed no child pornography whatsoever and under
17 those facts did you not agree that the reasonable conclusion to
18 be drawn would be those images had never been on the hard
19 drive, correct?

20 A. Sure.

21 Q. But you didn't include in this affidavit for the March,
22 2005 search of the March, 2005 computer, you put in information
23 about the investigation you did with linking George Eberle to

24 these Yahoo pictures, you included that, right?

25 A. Yes.

80

1 Q. But you didn't include in your affidavit the information
2 that you received from the House of Television, the computer
3 that George had possessed from January of 2004 through August
4 of 2004 -- had forensically examined the hard drive of that
5 computer, specifically looking for the photos that are at issue
6 in your search of the March computer, and you didn't find them,
7 you didn't put any of that information in your affidavit in
8 March?

9 A. That's correct.

10 Q. And you didn't put it in there why?

11 A. Because, like I stated, I didn't find any information
12 whatsoever linking the Eberles to using that computer. If I
13 had, I would have put it in there.

14 Q. So the fact that the House of Television says this is the
15 computer that the Eberles rented, does not qualify as "any
16 information linking the computer to the Eberles?"

17 A. I did not find on the computer hard drive anything

18 linking the Eberles to actually using it. I didn't find a

19 picture, I didn't find their name.

20 Q. You did have the manager of the House of Television

21 telling you this is the computer that the Eberles rented from

22 us?

23 A. Yes.

24 Q. And you don't have in your report anywhere anything about

25 you searching for the terms George and Alesha or glepa2001,

81

1 correct?

2 A. Yes, that's correct.

3 Q. Detective Lynn, isn't it true that when you were looking

4 at the computer in September of 2004, that you started out just

5 looking for child pornography, correct -- that's what you were

6 interested in finding, right?

7 A. The photos, yes.

8 Q So you looked for those photos and you didn't find any,

9 correct?

10 A. Well, in addition to those photos, you look at each photo

11 that comes up. And I was not finding anything.

12 Q. You didn't find any child pornography?

13 A. That's correct.

14 Q. And so when you got the computer, you did your data

15 carving, the first thing you're doing is looking to see is

16 there child pornography on this thing, right?

17 A. I'm looking for all images.

18 Q. You're looking for all the images and you look at all the

19 images to see if there's any child pornography, right?

20 A. That's correct.

21 Q. You did that and you didn't find any child pornography,

22 correct?

23 A. That's correct.

24 Q. So at that point in time you didn't care whether you

25 could develop forensic evidence to link the computer to George

82

1 or Alesha Eberle because there was no child pornography on this

2 thing anyway?

3 A. No, I did care.

4 Q. You cared enough to look to try and link to George and

5 Alesha Eberle, but when you decide that geez, the House of

6 Television gave me the wrong computer, you make no effort to go
7 back to the House of Television to try and locate the correct
8 computer, that's your testimony?

9 A. My testimony is that I did not believe that it was the
10 right computer. It could possibly be, it could possibly not.

11 At that time given everything I had, all the work, no, I didn't
12 go back and do a fishing expedition.

13 Q. A fishing expedition, why would it be a fishing
14 expedition?

15 A. Because we'd probably have to track down every computer.

16 Q. Well, how about having the House of Television checking
17 their records to make sure they gave you the right one?

18 A. I didn't do that.

19 Q. That would have been a pretty short fishing expedition,
20 would it not?

21 A. Could have been, could have not.

22 Q. As a county detective tasked with investigating the
23 sexual exploitation of children, you believe that some computer
24 that the House of Television had has child pornography on it,
25 you think they gave you the wrong one, but then say the heck

1 with it, I'm not going to go through the effort of trying to
2 find what I believe to be child pornography on one of these
3 computers?

4 MR. TRABOLD: Objection, asked and answered.

5 THE COURT: It has been, last time. I pick up this
6 stuff pretty quick, we're kind of rolling over the same ground.
7 Go ahead, you can ask it one more time.

8 MR. PATTON: That's all right, I'm finished. I have
9 to go over it again because I never know until afterwards
10 whether it's been picked up.

11 THE COURT: All right, Mr. Hadley.

12 CROSS-EXAMINATION

13 BY MR. HADLEY:

14 Q. Good morning, Detective Lynn.

15 A. Good morning.

16 Q. My name is Attorney Michael Hadley, I represent Alesha
17 Eberle. This is the first time we've met.

18 A. Could you please speak up.

19 Q. Detective Lynn, I want to pick up, please, where on the
20 last part, the House of Television search warrant, the part

21 Attorney Patton was just talking to you about. Am I correct,
22 you would be liable for civil damages if you were to search
23 with a search warrant the wrong premises or the wrong computer,
24 you're conscious of that when you execute a search warrant,
25 correct?

84

1 A. Yes.

2 Q. And you realize your obligations as a sworn officer of
3 the law is the execution of a search warrant be upon for the
4 contents described in the warrant, correct?

5 A. Yes.

6 Q. And part of that is when you go to the House of
7 Television making sure you ascertain that the computer you
8 search is the right computer, correct?

9 A. It's what I ask for, yes.

10 Q. So the truth of it is when you went to get that computer,
11 you sincerely believed it to be the Eberle's computer, correct?

12 A. At the time, yes.

13 Q. Okay. It's only because you found nothing that you think
14 it wasn't theirs?

15 A. It's because I didn't find anything relating their names

16 or pictures knowing that they had a web cam.

17 Q. But absent finding nothing, everything else you could

18 obtain said that was the Eberle's computer, correct?

19 A. Repeat that, please.

20 Q. Absent finding nothing, everything else that you could in

21 due diligence obtain said that was the Eberle's computer,

22 correct?

23 A. That's what they gave me, yes.

24 Q. In the early part of your testimony with Attorney

25 Trabold, you talked about your experience with child

85

1 pornographers, those who possess it, and you used the term

2 collector characteristics, correct?

3 A. I believe Attorney Trabold used collector

4 characteristics.

5 Q. Do you know what that term means?

6 A. Yes.

7 Q. I mean could we use that term as I cross-examine you, are

8 you comfortable with that term, collector characteristics?

9 A. Pretty much, yes.

10 Q. Okay. That would be that these things are readily

11 accessible in a file that somebody could click on and view

12 easily, correct?

13 A. That's not what collector characteristics --

14 Q. What does that term mean to you?

15 A. Collector characteristics -- particularly the preference

16 that they're collecting. If they like blonds, if they like

17 under five. If they like small body frames. Those are

18 characteristics.

19 Q. Okay. It's the person's -- likes or dislikes?

20 A. It's the collector's characteristics the person's

21 collecting.

22 THE COURT: You're going too fast, Mr. Hadley, slow

23 down just a little bit.

24 MR. HADLEY: I'm sorry.

25 BY MR. HADLEY:

1 Q. What would be the term you would use for the manner and

2 the number in which somebody would collect child pornography?

3 A. It could be characteristics of the people -- okay, people

4 who are collecting. But the people who store them on devices

5 and stuff.

6 Q. Did you tell us that your experience was that these are

7 normally numerous across the computer in your experience, child

8 porn images?

9 A. A collector would have more than one picture.

10 Q. More than one is two, are you talking normally dozens, in

11 your experience?

12 A. The lowest number I've ever had was, I believe, 24 and

13 that was on a CD. On a hard drive would be about 60.

14 Q. And the most you ever had?

15 A. Thousands.

16 Q. Thousands, okay. And isn't it true, Detective Lynn, that

17 the more that are possessed on a computer, the more likely

18 they'll remain accessible to Forensic Tool Kit later on,

19 correct?

20 A. I don't believe number has anything to do with how

21 accessible it is.

22 Q. So it doesn't matter, so one file has just as much chance

23 of being overwritten as a thousand files?

24 A. No, in that case, that's correct. In that case you're

25 correct.

87

1 Q. You told this court that it was your understanding that
2 when computers are re-rented by the House of Television, that
3 they're wiped, was that the term you used, wiped?

4 A. I don't believe I used a particular term. I remember
5 Attorney Patton stating that it was reformatted.

6 Q. Would you agree with me that there is a process in which
7 a hard drive can be completely cleared and made such that a
8 Forensic Tool Kit or forensic examination will be unable to
9 detect anything, correct?

10 A. Yes, that's true.

11 Q. What term do you want to use for that?

12 A. I use secure erase.

13 Q. All right, so you've got a secure erase on the one
14 extreme?

15 A. On one extreme, yes.

16 Q. That's writing everything over so it's perfectly secure
17 from any detective or whomever from looking at it, correct?

18 A. Correct.

19 Q. Now, short of that, a rental place could just reset the
20 computer so that a new owner could operate it with no obvious
21 remnants of a previous renter, correct?

22 A. They could reset it, yes. But a lot of people, like you
23 just said, if you may, a lot of people mix the terms wipe and
24 format and reset.

25 Q. The computer that you searched in 2004 from the House of

88

1 Television, what was your understanding of what had been done
2 to it?

3 A. I was originally told it was wiped, but I believe it was
4 reset.

5 Q. Okay. But you never believe there was a secure erase,
6 correct?

7 A. No.

8 THE COURT: What's the difference between wiping and
9 resetting?

10 THE WITNESS: Resetting will go back to the original
11 state it was prior to the previous user. And wiping you could
12 get rid of the operating system and stuff like that.

13 BY MR. HADLEY:

14 Q. With either of those, your Forensic Tool Kit could do you

15 some good, correct?

16 A. Yes, that's correct.

17 Q. One of the things you told the court and included in your

18 search warrants was that people could store this stuff on

19 removable media, correct, child pornography?

20 A. Correct.

21 Q. We're talking USB drives, CD ROMs, floppy disks, correct?

22 A. Correct.

23 Q. While you had what you believe to be a good-faith basis

24 in September of '04 to search a computer that was returned from

25 the Eberles to the House of Television, can you explain to me

89

1 why it is you never thought to get a search warrant for their

2 home to look for those things?

3 MR. TRABOLD: Objection, relevance.

4 THE COURT: What is the relevance?

5 MR. HADLEY: It's relevant, your Honor, because we

6 believe that after the search of the House of Television, she

7 concluded there's nothing there and that is based on what

8 you're going to hear that she knew she had the right computer.

9 THE COURT: Overruled, go ahead ask the question

10 again.

11 BY MR. HADLEY:

12 Q. After you go to the House of Television, why not go

13 search the home for removable media?

14 A. Because I was informed by the OCY worker that they had

15 the computer, she did not tell me about any other removable

16 storage devices.

17 Q. But it is your experience, as you put in your affidavits,

18 that child pornography can be stored in other forms?

19 A. Can be, yes.

20 Q. You asked for legal permission to search in both search

21 warrants for removable media, correct?

22 A. Correct.

23 Q. But you never, in at least as of September of '04,

24 decided to go to the Eberle's house, correct?

25 A. No, I did not.

1 Q. Okay. I want to talk about March of 2005, please, which
2 was the forensic interview, I guess on the 24th of March, 2005,
3 and then your execution of a warrant four days later. Before
4 you got your search warrant, you obviously did your interview,
5 which was not videotaped with Tiffany, correct?

6 A. That's correct.

7 Q. And you showed Tiffany the images from George's Yahoo
8 account, correct?

9 A. Yes.

10 Q. Did you bring any other child pornography images with you
11 to that interview with Tiffany?

12 A. No.

13 Q. You showed her only the pictures from George's account,
14 correct?

15 A. Yes.

16 Q. You brought those with you prior to hearing her answers
17 on the forensic interview, correct?

18 A. Well, yes, it's a different location from where my office
19 is. So I would have to take my files, yes.

20 Q. Is it your testimony that you found it even remotely
21 believable that the girl who was in those images, which the

22 judge is going to see, was the same person who was right in

23 front of you?

24 A. Yes, four years later when you have a girl crying, saying

25 that's me, yes.

91

1 Q. Is it just that she cried that made you believe her?

2 A. No, it was her body language. Normally a girl wouldn't

3 identify herself as having naked pictures of her if it wasn't

4 her.

5 Q. But isn't it true that her identification was only

6 possible with her acknowledging certain -- you called it

7 jewelry?

8 A. She said in the pictures she said the girl is me. She

9 gave us the description of the jewelry and that she was wearing

10 a bra in a couple of photos before she saw them. Which led me

11 to believe this could be her.

12 Q. Is it possible, because you had only brought the pictures

13 for George, because you had an ongoing investigation, isn't it

14 true that you actually -- were you leading her to say this was

15 her?

16 A. Absolutely not. Like I said, she gave me the description
17 before she saw the pictures, I didn't have to show her the
18 pictures.

19 Q. Did you ever consider, as an investigative technique, to
20 verify Tiffany's credibility of presenting her with an array of
21 photographs and asking her if any of them were her?

22 A. I would never ever show anyone child pornography unless I
23 had to by court. I would not take in other pictures of
24 children and have her look at it.

25 Q. You did not consider that?

92

1 A. No.

2 Q. Therefore, are you telling this court that you had
3 already in your own mind concluded that the pictures were
4 Tiffany before you showed them to her?

5 A. Pretty much when she gave us the description of exactly
6 what was in the picture, that she was wearing a necklace, she
7 had a bra on, she had a ring on her left hand, pretty much, not
8 many people would know that if that was in the picture unless
9 the picture was of them.

10 Q. Is there something in your experience that is unique

11 about a woman wearing a bra?

12 A. She's 12.

13 Q. Is that unique in your experience?

14 A. In a picture. If you have a girl, we have a girl who

15 said they took pictures of me and in some of the pictures I had

16 bra on, some I didn't, she has a necklace and she was wearing a

17 ring on her left finger and when you look at the pictures --

18 some of the pictures she had on a bra, some she doesn't. She

19 has a necklace and a ring on her left finger or the left hand.

20 Q. So it is true, then, prior to Tiffany's identification,

21 you yourself had concluded that the photographs were Tiffany's?

22 A. Most likely than not that they were her, yes.

23 Q. What did you say, I didn't hear the answer?

24 A. Most likely yes, they were her.

25 Q. Well, against the backdrop of your fear of showing the

1 wrong child to another child, what level of confidence did you

2 feel you had to have before you would show those pictures to

3 Tiffany?

4 A. I believe we actually covered the face and the chest area
5 first and then when she identified the items, we showed her the
6 picture. We showed her the head before we showed her the
7 chest, but she positively identified.

8 Q. I'm sorry, you showed her what, what did you show her
9 first?

10 A. In the picture, like I said, we covered part of the body.
11 We didn't flash the picture in front of her.

12 Q. Okay, let me get this right. You covered part of the
13 body show --

14 A. Show the chest.

15 Q. Show just the chest?

16 A. No, we covered the chest.

17 Q. And showed just the head?

18 A. The head with the necklace and the ring.

19 Q. And that's all you gave Tiffany to go on was her face?

20 A. After she said it was her, we removed the paper and she
21 said yes, definitely.

22 Q. Of course we know now that's not the truth?

23 A. That's what she's saying now.

24 Q. You don't disagree with her now, do you -- do you have
25 any evidence to disagree that's not Tiffany in the pictures?

1 A. I'm sorry.

2 MR. TRABOLD: What's the relevance of this, we're
3 here to --

4 THE COURT: Sustained.

5 MR. HADLEY: Thank you, your Honor, no further
6 questions.

7 THE COURT: Anything further, Mr. Trabold?

8 MR. TRABOLD: Just briefly, your Honor.

9 REDIRECT EXAMINATION

10 BY MR. TRABOLD:

11 Q. Now, did you conclude after you got the computer, the
12 first computer now in 2004, the information you had from the
13 House of Television -- did you think they had done, I think
14 your term was a secure erase or did you think it was a step
15 less than that?

16 A. I think it was a step less than that.

17 Q. Would it have been, and pardon my ignorance of computer
18 terms, but the fact that there was data or material on the hard
19 drive unrelated to the Eberles, did that cause you to conclude

20 that something less than a wipe or a total erase had been done?

21 A. Yes, that's correct.

22 Q. Closer perhaps to a reformatting, I think is the term?

23 A. Closer to that, yes.

24 Q. And the fact that the computer had only been reformatted,

25 did that even more cause you to conclude that maybe you didn't

95

1 have the right computer because there's nothing from the

2 Eberles on there?

3 A. Could be, yes.

4 Q. Because the entire hard drive wasn't wiped out?

5 A. It wasn't blank.

6 Q. Would that have led you to the conclusion that if Eberle

7 information had at one time been on this computer, it would

8 still be there?

9 A. Yes.

10 Q. Now, with regard to your report, I believe it's from

11 March 28th of '04, the defense cross-examined you on --

12 A. I'm sorry, March 28th of when?

13 THE COURT: '04.

14 THE WITNESS: There is no March 28th of '04, I have
15 a March 28th of '05.

16 BY MR. TRABOLD:

17 Q. Hold on, September 28th of '04. You were cross-examined
18 with regard to a data entry for the 28th of September, '04?

19 A. Yes.

20 Q. The entry you put in there is essentially four lines of
21 material?

22 A. That's correct.

23 Q. Was that intended to be the entirety of what you
24 discovered or what you did with regard to the Eberle case?

25 A. No, it was for me, I know what I did. And at that point

96

1 I wasn't going any further with the investigation.

2 Q. This is a summary?

3 A. Yes.

4 Q. Now, if you had included the information in the second
5 search warrant about the fact that you had looked at the first
6 computer and found nothing, is that all the information you
7 would have included or would you have included additional

8 information?

9 A. I would have included the fact that the House of

10 Television told me that they either wiped or reset the computer

11 and that absolutely nothing relating to the Eberles was found

12 whatsoever. No screen names, no images of them, their

13 children, nothing.

14 Q. Would you have included the indication from the House of

15 Television that the computer had been re-rented?

16 A. Yes, I would have.

17 Q. With regard to why no FTK report was generated for your

18 first search. Are you in the habit of generating such reports

19 for cases that are not going to go forward with prosecution?

20 A. If there's nothing found, no, I don't generate a report.

21 Q. Would there be any reason for you to generate or, I don't

22 even know if generate is the correct term, but compile an FTK

23 report for a case that's not going to move forward?

24 THE COURT: What does FTK stand for for the record?

25 THE WITNESS: Forensic Tool Kit.

2 Q. Just so we're clear for the record, Forensic Tool Kit is
3 just the software that you use to examine a hard drive?

4 A. Yes, it's the software created by Access Data.

5 Q. Are you in the habit of doing that for cases that aren't
6 going to move forward for prosecution?

7 A. No, I don't generate a report unless I find something on
8 the computer.

9 Q. Now, with regard to this whole issue of your discussion
10 of the 2001 series of photographs with the victim, Tiffany
11 Smith. Prior to showing her the pictures, did you provide her
12 a description of what the pictures were?

13 A. No, she provided that to me.

14 Q. How did your discussion with her begin with regard to
15 these pictures?

16 A. I asked her if she could tell me about the pictures that
17 were taken.

18 Q. And you only discussed this with her after she revealed
19 in the forensic interview that pictures had been taken of her?

20 A. Yes.

21 Q. And did the information that she told you about the
22 pictures, did that information occur prior to her seeing any of

23 them?

24 A. Yes.

25 Q. Did the information that she provided to you about the

98

1 sum and substance of the pictures correspond to what was

2 depicted in the actual pictures?

3 A. Yes.

4 Q. And Tiffany was three or four years older at the point in

5 time when you interviewed her from when the pictures would have

6 been taken?

7 A. Yes.

8 Q. And based on your experience, was her emotional reaction

9 consistent with somebody that had been victimized?

10 A. Yes.

11 Q. And did she provide you more information than to just say

12 yes, that's me?

13 A. She said that's me and that they took the pictures.

14 Q. But I mean did she provide any descriptive detail?

15 A. About the items she was wearing?

16 Q. Correct.

17 A. Yes.

18 Q. Would you agree with me it was more than just somebody
19 saying yeah, that's me, and those are the pictures they took of
20 me?

21 A. Yes.

22 Q. Prior to her telling you about the jewelry and the bra,
23 did you reveal those details to her at all?

24 A. No.

25 MR. TRABOLD: Nothing further, your Honor.

99

1 RECROSS-EXAMINATION

2 BY MR. PATTON:

3 Q. Mr. Trabold asked you some questions about if you would
4 have put in your affidavit in March of 2005 the fact that you
5 had searched the computer from the House of Television about
6 what other evidence or what information you put in the
7 affidavit, do you recall that?

8 A. Yes.

9 Q. I believe you testified that you would have in the March,
10 2005 affidavit, put in the fact that you searched the computer

11 from the House of Television for these specific images from

12 Yahoo and did not find them, nor any child pornography, you

13 would have also put in that the computer had been reformatted

14 and re-rented, correct?

15 A. I would also put that I found absolutely no information

16 pertaining to the Eberles found on the computer, like I've

17 said.

18 Q. But you had also agreed with Mr. Trabold when he asked

19 you about the fact that it was being reformatted, would not

20 have prevented you from finding those images had they actually

21 been there or would not have prevented you from finding

22 evidence linking the computer to the Eberles, correct?

23 A. Can you repeat that.

24 Q. Your affidavit itself states that through the forensic

25 software and with your forensic training, you can recover

100

1 deleted files, correct?

2 A. Correct.

3 Q. So the fact that the files may have been deleted wouldn't

4 have affected whether or not you felt you could retrieve them

5 using forensic software, correct?

6 A. If they had been written over or had a better wiping
7 system at the time.

8 Q. Well, I'm not talking about what could have been, I'm
9 talking about what the House of Television actually did?

10 A. When I spoke with them originally, they used the term
11 wipe. Wipe could be anything, wipe could be wiping where it
12 would be overwritten or not.

13 Q. Ma'am, you've already testified that when you actually
14 looked at the hard drive, you quickly concluded that it hadn't
15 been completely wiped?

16 A. That's correct.

17 Q. So you wouldn't have put in your affidavit in March, 2005
18 that the House of Television wiped off all the information,
19 would you have?

20 A. I would have put that they did some sort of resetting,
21 reformatting or something, because it was re-rented.

22 Q. Well, let me put it to you this way. Before you ever got
23 the computer from the House of Television, you knew it had been
24 reformatted and re-rented, correct?

25 A. I knew something had happened to it.

1 Q. But even after you got that information, you went to a
2 judge and said I still have probable cause to believe that
3 these images are on there and I can find them, correct?

4 A. I did not know exactly what was done to it.

5 Q. Well, after you got the computer, you talked to Mr.
6 Trabold about the things you found, all the stuff you found
7 which led you to believe that it hadn't been completely wiped
8 or secured enabled in your terms or whatever you call it?

9 A. Secure erase.

10 Q. Secure erase?

11 A. Yes.

12 Q. You knew that hadn't happened?

13 A. That's correct.

14 Q. You actually found data in the unallocated space,
15 correct?

16 A. That's correct.

17 Q. So you knew whatever the House of Television did to
18 prepare for re-renting, didn't make the information in the
19 unallocated space unavailable to you through the use of
20 forensic software?

21 A. That's correct.

22 Q. May I presume you would have told the judge that in your
23 affidavit?

24 A. Yes.

25 Q. But you said you included the fact in the affidavit the

102

1 fact that the computer had been re-rented, is that correct?

2 A. Yes.

3 Q. Did you ever check and find out how long the computer had
4 actually been re-rented for?

5 A. You asked me that before, the answer is still no.

6 Q. So you would have put in there that the computer had been
7 re-rented, but you had no idea how long it had been re-rented
8 for?

9 A. No.

10 Q. Well, would you agree that the length of time it had been
11 re-rented, would be relevant to the probability that images in
12 the unallocated space would have been overwritten?

13 A. Could be.

14 Q. The longer it's been re-rented, the higher the

15 possibility that data that's in the unallocated space would

16 have been overwritten, correct?

17 A. That could be.

18 Q. The shorter period of time, the less likely?

19 A. That could be, depends on how much activity the people

20 use on the computer.

21 Q. Regardless of the volume of activity a particular person

22 uses, whatever volume that is, the longer they do it, the more

23 they're going to overwrite, correct?

24 A. Yes, that's correct.

25 Q. And you said that you would put in the affidavit the fact

103

1 that you didn't find anything linking the computer to the

2 Eberles?

3 A. I would have, yes.

4 Q. Would you put in the affidavit that the House of

5 Television was told turn over the computer that the Eberles

6 rented and that they gave you that computer?

7 A. Yes.

8 Q. And would you have put into your affidavit, may I

9 presume, the fact that while you thought the House of
10 Television gave you the wrong computer, you never took any
11 steps whatsoever to try and locate the correct computer from
12 the House of Television, would you have put that in your
13 affidavit?

14 A. I probably would have, yes.

15 MR. PATTON: Those are my questions, your Honor.

16 THE COURT: Okay. You get one short shot at it
17 here.

18 MR. HADLEY: Three short questions, your Honor.

19 RECROSS-EXAMINATION

20 BY MR. HADLEY:

21 Q. Detective Lynn, in September of 2004, the House of
22 Television hard drive, the protocol is you make a mirror of
23 that and then you work from the mirror, correct?

24 A. Yes.

25 Q. Do you still have that mirror?

104

1 A. No, I don't.

2 Q. You, like the rest of us, your memory fades with time,

3 correct?

4 A. Yes.

5 Q. And that's why you make reports to refer to later,

6 correct?

7 A. Yes.

8 MR. HADLEY: That's all I have, judge, thank you.

9 THE COURT: Thank you, you're excused.

10 MR. HADLEY: May it please the court, your Honor,

11 are we going to need her testimony for the motion in limine?

12 MR. TRABOLD: I don't know that we necessarily need

13 her to introduce the chats into evidence.

14 THE COURT: I don't see the purpose in examining her

15 about the chats. I mean I have exemplars in the motion. The

16 problem is mine, I'm not sure what you're asking me, what do

17 you want me to do?

18 MR. HADLEY: I guess I want to make sure that before

19 you excuse her and she leaves, nobody needs her for the motion

20 in limine.

21 THE COURT: Well, do you need her?

22 MR. HADLEY: I don't need her.

23 THE COURT: Mr. Patton, do you need her?

24 MR. PATTON: I'm not a party to that motion.

25 THE COURT: You don't need her then.

105

1 MR. HADLEY: I don't need her as long as the whole
2 chats will come in for your consideration.

3 THE COURT: What do I have right now, just excerpts
4 of them, is that it?

5 MR. TRABOLD: Correct.

6 THE COURT: Well, that's up to you folks.

7 MR. TRABOLD: I don't think we need her for that.

8 THE COURT: I don't, either. So after that long
9 discussion, you're free to step down.

10 THE WITNESS: Thank you.

11 MR. TRABOLD: Nothing further from the government,
12 your Honor.

13 THE COURT: Can we get a little time check here.
14 What do you figure there, Mr. Patton?

15 MR. PATTON: We'll be here a good part of the
16 afternoon, your Honor.

17 THE COURT: Okay, Mr. Patton.

18 MR. PATTON: Your Honor, we would call Carl

19 Buckshaw.

20 MR. TRABOLD: Your Honor, can I have an offer of

21 proof as to what the relevance is of this testimony?

22 MR. PATTON: Your Honor, Mr. Buckshaw is going to

23 testify about the fact of renting a computer from the House of

24 Television. Then we'll put on the testimony of an individual

25 who did a forensic evaluation of that hard drive and explain to

106

1 your Honor what kind of information is available on that hard

2 drive.

3 THE COURT: I'm sorry, tell me again, you say he's

4 going to talk about renting a computer. Tell me again, I

5 didn't get it?

6 MR. PATTON: Carl rented a computer from the House

7 of Television. Which I then took and I had our in-house

8 computer person run Forensic Tool Kit on the hard drive of

9 that. I'm going to have that person testify to explain to you

10 and show to you the volume of information that's available on

11 those hard drives. Even after they're prepared for re-renting

12 and are re-rented. To argue about the reasonableness of the

13 conclusions drawn by Detective Lynn.

14 THE COURT: All right.

15 MR. TRABOLD: What is the relevance of that, the

16 only thing that is relevant is what happened to the Eberle's

17 computer and hard drive. Not what examination could be done on

18 a hard drive rented by somebody working for the Federal

19 Defender's office four years after the fact, or two years after

20 the fact, whatever it may be.

21 THE COURT: I mean, I'm willing to think about this

22 some more, but you've got to run this relevance by me again?

23 MR. PATTON: Your Honor, Detective Lynn is

24 testifying that she did this search of the hard drive, but she

25 doesn't have any reports regarding how she did that and the

107

1 information that was developed. And then has testified about

2 the conclusions she drew about the hard drive, and about

3 whether or not the Eberles had possessed it. What I intend to

4 do is put on actually two different people --

5 THE COURT: She said she didn't find any evidence of

6 pornography or that it was the Eberle's computer, as I

7 remember?

8 MR. PATTON: That's correct. It's our position,

9 number one, she never looked for anything linking it to the

10 Eberles because she didn't care to link it to the Eberles

11 because the House of Television told her it was the Eberle's

12 computer, she searched it for child pornography and didn't find

13 any child pornography. She just had no reason to try and link

14 it up. But what I want to impress upon your Honor and show

15 your Honor is the volume of information that are still

16 available on these hard drives and the reasonableness of

17 Detective Lynn's position that I searched this hard drive, came

18 up with all this data, did not find the images that I'm looking

19 for or indeed any child pornography. And then say well, I

20 didn't mention that to the judge later on because it wasn't

21 relevant. I believe I have the right to develop the evidence

22 to support that. Because right now you don't have, nobody has

23 been able to see what it is she pulled up during her

24 examination because she didn't keep any reports, she didn't run

25 and reports of it.

1 THE COURT: All right. I'll tell you what. I'm
2 going to take the testimony. And then I'm going to determine
3 whether it's relevant at some point. But how long is this
4 going to take us?

5 MR. PATTON: Mr. Buckshaw will be about five
6 minutes. All I want to show him is the rental agreement that
7 he signed and they delivered to him.

8 THE COURT: Would the government just stipulate to
9 what he's going to say?

10 MR. TRABOLD: Yes, if you're going to hear the
11 testimony --

12 THE COURT: Why don't you just put on the record
13 what this witness is going to say, then we'll see if he agrees
14 with it. That will be the shortest testimony anybody has given
15 today. Go ahead.

16 MR. PATTON: Mr. Buckshaw will testify that he went
17 to the House of Television, said he wanted to rent a computer,
18 did all the paperwork and had the computer delivered to his
19 house. To actually rent a computer from the House of
20 Television, they actually have to bring it to your residence,
21 they won't just let you carry it out the door. Once that

22 happened, Mr. Buckshaw gave the computer to me, I brought it
23 back to our office. And then Mark Ganley, who is our computer
24 system analyst, took the hard drive out of that computer and
25 ran Forensic Tool Kit.

109

1 THE COURT: All right, so stipulated.

2 MR. TRABOLD: I have no reason to dispute that, your
3 Honor.

4 THE COURT: Thank you, sir, you're excused.

5 MR. PATTON: Your Honor, I have testimony to put on
6 from Craig Culhane, who is the manager of the House of
7 Television, who interacted with Ms. Lynn. And Will Nieder, for
8 lack of a better way to put it, is their tech person, who can
9 explain exactly what it is that they do --

10 THE COURT: They're here and ready to go now?

11 MR. PATTON: Yes.

12 THE COURT: All right, you can call them after we
13 take a short recess.

14 (Recess from 11:41 a.m.; until 11:50 a.m.)

15 THE COURT: All right, Mr. Patton.

16 MR. PATTON: Your Honor, we'd call Mr. Craig
17 Culhane.

18 THE COURT: Come on up here, Mr. Culhane. Spell
19 your last name for my court reporter?

20 THE WITNESS: C-u-l-h-a-n-e.

21 CRAIG CULHANE, DEFENSE WITNESS, SWORN

22 DIRECT EXAMINATION

23 BY MR. PATTON:

24 Q. Mr. Culhane, where do you work?

25 A. House of Television, Corry, Pennsylvania.

110

1 Q. What type of business is that?

2 A. It's a rent to own business.

3 Q. You guys rent computers?

4 A. Yes.

5 Q. In the rent to own business, whether you're renting

6 computers or any other items, is it important for you as a

7 business to be able to keep track of the items you are renting?

8 A. Absolutely.

9 Q. Does your business have systems set up to help you track

10 the different items that you rent?

11 A. Yes.

12 Q. With regards to computers, could you just give us a

13 general idea of the systems you guys use to keep track of your

14 rental units?

15 A. Every unit, regardless of whether it's a computer or a

16 couch or a TV, has got a separate stock number on it. Which

17 when we enter them into our system, the serial number goes in

18 and then you put the stock number on it. So everything has got

19 a certain number on it. We do inventory twice a week.

20 Q. If you rent an item to an individual and they at some

21 point bring the item back, when the item is brought back to

22 you, is there anything you guys do to check to make sure you're

23 getting the right item back?

24 A. Yeah, I mean, I'd say 99 out of a 100 we know what the

25 item is. But we always check stock numbers.

111

1 Q. Every time something gets returned, you guys check the

2 stock number against your records to make sure the person who

3 rented this item is bringing you back the item he rented from

4 you?

5 A. Yes.

6 Q. When you guys get computers returned to you, what steps
7 do you take to prepare the computer for re-rental?

8 A. That's really -- what kind of computer it is is really
9 going to depend on what I will do to it. Some computers have
10 disks for restore, some are self-restored disks. If it's a
11 machine that has a disk, it could be one disk, two disks, three
12 disks. You turn the machine on, flop the disk in, hit the
13 restart button, follow the on-screen directions. Like I said,
14 it might be one disk, it might be three. If it's a
15 self-restore, you press the power button on the machine, start
16 tapping F10, and then it will walk you right through it.

17 Q. Are you yourself any kind of expert on computers and how
18 they work?

19 A. Absolutely not, no.

20 Q. Is it fair to say that you have been given instructions
21 on steps to follow to restore the computer and you just follow
22 those instructions?

23 A. Yes.

24 Q. I want to talk to you about a computer that was rented to

25 George Eberle. Do you recall back in the year 2004 renting a

112

1 computer to Mr. Eberle?

2 A. Back then, yeah.

3 Q. At some point in time were you contacted by Detective

4 Jessica Lynn from the Erie County detectives?

5 A. Yes.

6 Q. Did she ask you about this particular computer?

7 A. What the conversation was, I mean, I don't recall.

8 Q. Could you just give the purpose of why she was calling

9 and the actions you took in response to her call?

10 A. I have a search warrant for a certain computer, which I

11 had to get from somebody who had it on rent and gave it to her.

12 Q. She says I have a search warrant for a computer?

13 A. Yes.

14 Q. And was it identifying what computer the search warrant

15 was for?

16 A. Yes.

17 Q. And is it accurate to say that was the computer that

18 George Eberle had rented from your store?

19 A. Yes.

20 Q. Now, at that point in time when you had contact, did you
21 have that computer in your store?

22 A. No.

23 Q. Were you directed to take steps to get it back into your
24 store?

25 A. I believe so, yes.

113

1 Q. Did you take steps to get it back into your store?

2 A. Yes.

3 Q. Let me ask you this. How did you make sure that the
4 computer you were going to get back and turn over was the right
5 computer?

6 A. Got into my system, found out what the stock number was
7 on the computer that Mr. Eberle had. Got in, did a search to
8 see who had it now. I found out who had it, called that person
9 and got my computer.

10 Q. Once you got the computer back, did you do anything to
11 it?

12 A. No.

13 Q. Did you turn it over to Detective Lynn?

14 A. I'm pretty sure it was her. I turned it over to

15 somebody.

16 Q. After you had given the computer to whatever law

17 enforcement officer who wanted it, as a result of the search

18 warrant, were you ever contacted and asked are you sure you

19 gave us the right computer?

20 A. Not that I recall, no.

21 Q. Were you ever in any way contacted by phone or in person,

22 ever asked or told I think you gave us the wrong computer,

23 could you double check to make sure you gave us George Eberle's

24 computer?

25 A. I don't believe I was ever asked that either, no.

114

1 Q. Are you confident that you gave law enforcement the

2 computer that George Eberle rented from your store?

3 A. I'm a hundred percent sure.

4 Q. No question at all in your mind?

5 A. No.

6 Q. Mr. Culhane, I want to show you what I have marked as

7 Defendant's Exhibit D, it's two pages and ask you to take a

8 look at it?

9 A. Okay.

10 Q. Do you recognize those as records coming from your store?

11 A. Yes.

12 Q. If I could have those back, I'll put them on the screen.

13 If you watch, it will come up your screen, okay. In this first

14 page of the exhibit, is that an item history report for the

15 computer that George Eberle rented from you guys?

16 A. Yes.

17 Q. And is it accurate to say that that report basically

18 documents all the different people who have rented that

19 particular computer from your store?

20 A. Yes.

21 Q. And is this based on that stock number you previously

22 testified to?

23 A. Yes.

24 Q. Do you see where I'm pointing here on the date of

25 8/20/04, it says "item was terminated, reason, return with

1 balance, okay to re-rent?"

2 A. Yes.

3 Q. Does that represent George Eberle returning the computer

4 to your store --

5 A. Yes.

6 Q. On August 20th of 2004. According to this, when was the

7 computer re-rented then?

8 A. On the 26th of August, 2004.

9 Q. To a Ms. Wanda Urban?

10 A. Yes.

11 Q. When was that gotten back from Ms. Urban?

12 A. The 3rd of September, 2004.

13 Q. Would that have been when you went back and got the

14 computer from Ms. Urban because you had to turn it over?

15 A. Yes.

16 Q. Now, the report indicates that it was loaned to a Jim

17 George, could you just explain why that's there?

18 A. With our system I can't just give something out, I have

19 to have it accounted for. So the easiest way for me to do that

20 is I pick somebody who had a computer already, used his name

21 and loaned it to him, so in my inventory that item was

22 accounted for.

23 Q. So is it accurate to say that you didn't really give it

24 to Jim George?

25 A. Not until after.

116

1 Q. Okay. I want to show you the second page of this

2 exhibit, is this another record from your store?

3 A. Yes.

4 Q. With regards to this particular computer that we've been

5 talking about?

6 A. Yes.

7 Q. Does that detail the rental of the computer to this Wanda

8 Urban?

9 A. Yes.

10 Q. Is it accurate to say that Wanda Urban is the client or

11 customer who got the computer after George Eberle returned it

12 to your store?

13 A. Yes.

14 Q. How long did Ms. Urban have this computer?

15 A. Looks like a week.

16 Q. From?

17 A. From -- excuse me, the 26th of August to the 3rd of
18 September.

19 Q. So nine days?

20 A. Yes.

21 Q. After you retrieved it from Ms. Urban, you turned it over
22 to law enforcement?

23 A. Yes.

24 Q. With regard to your putting in Jim George had the
25 computer, you said you have to put something in your records;

117

1 is it possible that you did something similar to that earlier
2 in time with this computer so you just got messed up as to
3 which one George Eberle had rented?

4 A. No.

5 Q. You're absolutely certain this was the computer George
6 Eberle rented?

7 A. One-hundred percent certain.

8 Q. And that's the one you gave to whatever law enforcement
9 officers came to pick it up?

10 A. Yes.

11 Q. At some point was the computer returned to you?

12 A. I believe it was late September.

13 Q. Did the computer just go back into your guys stock?

14 A. Yeah, I took it out of loan, in fact, Jim George, the guy

15 who I used, this is going back -- I rent so many computers I'm

16 trying to think. I believe that Jim George had a computer like

17 the one in question and wasn't happy with it. So I believe I

18 swapped him out with that one after I got it back.

19 Q. If, after the law enforcement people had picked up this

20 computer, if they had contacted you and asked you if you were

21 sure that you had given them the computer that George Eberle

22 rented from your business, what would you have told them?

23 A. You have the computer that George Eberle rented from me.

24 Q. No question?

25 A. No.

118

1 MR. PATTON: Those are my questions, your Honor.

2 THE COURT: All right. Do you have any questions of

3 this gentleman?

4 MR. HADLEY: No, sir.

5 THE COURT: All right. Mr. Trabold.

6 CROSS-EXAMINATION

7 BY MR. TRABOLD:

8 Q. Do you have the exhibit there in front of you?

9 A. I got copies with me.

10 Q. Just so I'm clear on what we're talking about here, if
11 you have it with you. Does that say on January the 21st of
12 2004 was the first time the computer we're talking about was
13 rented to Mr. Eberle?

14 A. Yes.

15 Q. And then it indicates that there was some service done to
16 the computer?

17 A. Yes.

18 Q. Do you know what the service was?

19 A. The problem was it will not read disks. He comments when
20 he fixed it, replaced CDRW and installed the Barney software --

21 Q. Can you say that again, the last part about the software,
22 I didn't hear what you said?

23 A. It says replaced CDRW with an R-tech 52 by 24 by 52, and
24 installed the Nero-Barney software.

25 Q. Do you have any idea what that means?

1 A. A Nero is for burning music, burning CD's, as far as I
2 know. I'm not really good with all that software, I know how
3 to restore them, I know how to maybe change a drive, that's
4 about it.

5 Q. Does that have anything to do with the hard drive, that
6 you can tell on there?

7 A. No.

8 Q. And just so I'm clear, this document that you have here
9 isn't on its face one-hundred percent accurate, correct,
10 because you didn't in fact loan the item out to Jim George, you
11 gave it to law enforcement?

12 A. True.

13 Q. And is there something that prevents you from typing in
14 here item given to law enforcement?

15 A. This was our old software -- I probably made a note that
16 it was given to law enforcement. But I don't believe I could
17 have typed it anywhere in here, that I physically typed it into
18 that software.

19 Q. And do you agree with me that the purpose of keeping

20 records like this is so you can know many years into the past

21 what it is that you actually did with the computer, correct?

22 A. Uh-huh.

23 Q. And this record is not accurate?

24 A. I would say that the record is accurate. I mean I know

25 where that computer went, it's my store.

120

1 Q. Well, it didn't go to Jim George, though, on September 3,

2 2004?

3 A. Right.

4 MR. TRABOLD: Okay. Nothing further.

5 THE COURT: Anything else of this gentleman?

6 MR. PATTON: Yes, your Honor.

7 REDIRECT EXAMINATION

8 BY MR. PATTON:

9 Q. When you guys were contacted from law enforcement, years

10 hadn't gone by between the time George had returned that

11 computer to you and the time law enforcement contacts you, is

12 that correct?

13 A. Correct.

14 Q. It was less than two weeks?

15 A. The item was terminated on the 20th of August of 2004.

16 And loaned to Jim George on 3rd of September of 2004, so it was

17 within two weeks.

18 Q. And at that point in time is there any question in your

19 mind that you had given law enforcement the correct computer?

20 A. No.

21 Q. At this point in time is there any doubt in your mind

22 that you gave law enforcement the correct computer?

23 A. No.

24 Q. You would have told that to law enforcement if they would

25 have asked you those questions?

121

1 A. Yes, I would have.

2 MR. PATTON: That's all.

3 THE COURT: Thank you, Mr. Culhane, you're excused,

4 sir. All right, we're in recess until 1 o'clock.

5 (Luncheon recess from 12:10 p.m.; until 1:10 p.m.)

6 THE COURT: All right, Mr. Patton.

7 MR. PATTON: Your Honor, we'll call Mr. Will Nieder,

8 he's from the House of Television.

9 THE COURT: Would you spell your name for my court
10 reporter?

11 THE WITNESS: My name is William G. Nieder,
12 N-i-e-d-e-r, Jr.

13 WILLIAM NIEDER, DEFENSE WITNESS, SWORN

14 DIRECT EXAMINATION

15 BY MR. PATTON:

16 Q. Sir, do you pronounce your last name Nieder?

17 A. Nieder.

18 Q. And, Mr. Nieder, where do you work?

19 A. House of Television.

20 Q. What does that particular business do?

21 A. We are a rent to own business with 12 locations.

22 THE COURT: Keep your voice up, please.

23 BY MR. PATTON:

24 Q. What location do you work at?

25 A. I work at the corporate office.

1 Q. And what do you do there?

2 A. I am the IT manager, I work on computers and take care of
3 all computer systems for the company.

4 Q. Are you familiar with the steps your business takes when
5 computers are returned from rental to prepare those computers
6 for re-rental?

7 A. Yes.

8 Q. What do you guys do to those computers?

9 A. When we get the computer back in, the store manager or
10 whoever is in the store, is instructed to do a format and
11 restore.

12 Q. A format and restore?

13 A. Yes.

14 Q. Would you explain what a format and restore is?

15 A. Formatting is the cleaning off the drive and restoring it
16 back to factory settings just like the computer was when it was
17 purchased.

18 Q. When you guys do the reformatting and restoring, does
19 that take all the information that's on the hard drive of that
20 computer when it's brought back to your store and physically
21 remove all of that information from the hard drive?

22 A. It does remove it but it doesn't completely delete it.

23 Q. Is it accurate to say that the next person who rents the

24 computer wouldn't be able to access that?

25 A. No, they would not.

123

1 Q. Is it possible to access some of that information using

2 forensic software programs?

3 A. Programs and such, yes.

4 Q. Does your business use programs that actually completely

5 wipe hard drives such that no information that was on the hard

6 drive at the time that the computer was returned --

7 A. No, it's writing one and zeros to the drive and we don't

8 do that.

9 Q. Were you ever contacted by Detective Jessica Lynn or

10 anyone from Erie County law enforcement to ask you questions

11 about the processes your business uses in preparing the

12 computers for re-rental?

13 A. Just Mr. Townley.

14 Q. A computer was taken from your store in Corry pursuant to

15 a search warrant, I want to ask you about that computer. Do

16 your records indicate that some service was done to that

17 computer while Mr. Eberle had the computer?

18 A. Yes.

19 Q. What was done?

20 A. We replaced a CD drive, the CD burner and reloaded the

21 software.

22 Q. When was that done?

23 A. 1/28/04.

24 Q. So when you say replaced the CD drive, you mean you're

25 physically taking the physical CD drive that you actually place

124

1 a CD into and putting a new one in, is that correct?

2 A. Yes.

3 Q. And then you have to ask the appropriate software to run

4 that particular CD?

5 A. Right, we add the driver and also the software for

6 burning CD's.

7 Q. When you add that software to the operating system so you

8 can run the CD drive, would that overwrite like any pictures

9 that Mr. Eberle would have saved onto his hard drive?

10 A. No, it's just a driver to make the device run.

11 Q. So if Mr. Eberle had had pictures saved onto his hard

12 drive, placing this new software on it would not have any
13 impact on those pictures?

14 A. No.

15 MR. PATTON: Those are my questions, your Honor.

16 MR. HADLEY: Nothing, your Honor, thank you.

17 CROSS-EXAMINATION

18 BY MR. TRABOLD:

19 Q. Sir, is it accurate to say you did not actually do the
20 format and restore on the Eberle's computer in this case?

21 A. That's correct, it was done in the store.

22 Q. And that's just random procedure, you don't do the
23 formatting and restores for any of the computers, that's
24 something done by individual store employees?

25 A. Most of the time. If they come in for service, then I'm

125

1 required to restore them before they go back. Only if they're
2 in for service.

3 Q. And the goal, obviously, of the format and restore is to
4 have renter B not be able to access anything that renter A had
5 on the computer, it's to give the new renter a clean slate?

6 A. Yes.

7 Q. And you would agree with me, though, by virtue of being
8 an IT person, that computers, like most other consumer goods,
9 can be somewhat temperamental; I mean you can get one computer
10 hard drive for one computer generally that can operate like a
11 charm and another one might be just a piece of junk or a lemon?

12 A. Sure.

13 Q. That's just like cars, you could get the same model and
14 make of cars, one would be great, another one would be a piece
15 of junk?

16 A. Yes.

17 Q. That definitely holds true for computers?

18 A. Yes.

19 MR. TRABOLD: Nothing further, your Honor.

20 THE COURT: Anything else?

21 MR. HADLEY: I just have one question, your Honor.

22 THE COURT: All right, go ahead.

23 CROSS-EXAMINATION

24 BY MR. HADLEY:

25 Q. Sir, do you guys ever provide any of your stores with

1 software to do a secure erase of a hard drive?

2 A. No.

3 MR. HADLEY: Thank you.

4 THE COURT: Thank you, sir.

5 MR. PATTON: Could Mr. Culhane and Mr. Nieder be

6 excused?

7 THE COURT: Yes, they sure are, thank you.

8 MR. PATTON: We call Mark Ganley.

9 THE COURT: Before you get all the way up here, is

10 this the gentleman who's testifying pursuant to your offer of

11 proof?

12 MR. PATTON: Yes.

13 THE COURT: This is one example where I'm dense, I

14 didn't get it the first time, maybe more than one, would you

15 run that by me one more time, Mr. Patton, before we get into

16 this?

17 MR. PATTON: Your Honor, my intention is to show you

18 the volume of data that is still on the hard drives from a

19 computer at the House of Television after that computer has

20 been returned by a renter, has been reformatted and restored

21 and offered up for rental. To give you an idea of how much
22 data is on there, to then support our argument that if you
23 searched one of these hard drives for particular images, didn't
24 find them, in fact, did not find any child pornography, that it
25 is not reasonable to conclude that you have the wrong computer.

127

1 And, also, to quite frankly cast doubt on Detective Lynn's
2 testimony that she looked or looked very hard for evidence
3 forensically linking the computer to the evidence.

4 THE COURT: All right, go ahead. Sir, spell your
5 name for my court reporter?

6 THE WITNESS: Last name Ganley, G-a-n-l-e-y. First
7 name is Mark, M-a-r-k.

8 MARK GANLEY, DEFENSE WITNESS, SWORN

9 DIRECT EXAMINATION

10 BY MR. PATTON:

11 Q. Mr. Ganley, where do you work?

12 A. I work for the Federal Public Defender's office in
13 Pittsburgh, Pennsylvania.

14 Q. What do you do for the Federal Defender's?

15 A. My title is network, I'm computer network administrator.

16 And my job is to purchase the computers, maintain them, install

17 software, design databases for people who need them. And also

18 in my work I'm called upon to do forensic examinations on

19 occasion.

20 Q. With the proliferation of child pornography cases and

21 computer based child pornography cases, have you received some

22 training from the office for doing the forensic examination of

23 hard drives?

24 A. Yes, I have. I undertook a class from the Internet

25 crimes group that the agent mentioned, in 2001. There was 24

128

1 hours worth of training. And I spent three days at a Forensic

2 Tool Kit boot camp for doing forensic examinations on

3 computers.

4 Q. Have you had other training related to the general

5 operations of computers with regard to the work you do on a

6 day-to-day basis maintaining computers and computer networks?

7 A. Certainly. I've attended college courses at Penn State

8 University and the local community college in Allegheny County,

9 and I've got a degree from the Computer Technical Institute

10 from 1987.

11 Q. Does your daily work require you to work on computers and

12 help users be able to use computers effectively?

13 A. Yes, that's primarily my job.

14 Q. Now, to be fair, is it accurate to say forensic

15 examinations of computers is not the main part of your

16 employment?

17 A. No, it's not.

18 Q. How many computer drives have you actually forensically

19 examined?

20 A. I've examined two drives that were child pornography

21 cases, where we actually obtained the drive and could do an

22 exam. And I've probably done another dozen that were not

23 pornography or child porn related.

24 Q. With regards to forensic exams of hard drives dealing

25 with child pornography, you said there are only two of them

129

1 you've done where you physically have the hard drive?

2 A. That's correct.

3 Q. Have you been involved in going to the FBI office in

4 Pittsburgh to review hard drives there under basically the

5 terms of discovery that had been set by the court?

6 A. Yes, I have, I visited the FBI. I've also worked with

7 the Postal Inspectors, and I visited the state police barracks

8 in Indiana and in Butler and in Beaver for various cases.

9 Q. And during those visits have you engaged in different

10 aspects of forensically examining computers?

11 A. Yes.

12 Q. Are you able to run Forensic Tool Kit?

13 A. Yes, I am.

14 Q. Do we own Forensic Tool Kit?

15 A. Yes, we do.

16 Q. In September of last year did I ask you to use Forensic

17 Tool Kit to evaluate the hard drive of a computer rented from

18 the House of Television?

19 A. Yes.

20 Q. Could you explain to the judge what you did to examine

21 that hard drive?

22 A. Certainly. I drove to Erie to pick up the drive. I took

23 the drive out of the rented computer, brought it back to

24 Pittsburgh. I acquired the drive using forensic software and

25 put it on a forensic computer and did the examination, just as

130

1 the agent would have done.

2 Q. When you say you acquired the drive, is it accurate to

3 say you want to keep the drive that's in question in tact, not

4 change anything on it?

5 A. That's correct. So you have to use a special process

6 where you write protect the drive so that nothing changes in

7 the process of creating the image. Then you always work from

8 the image so you never touch the original drive.

9 Q. When you acquire it, then you create what is sometimes

10 referred to as a mirror image of the questioned drive, that's

11 the drive that you actually run the Forensic Tool kit on and do

12 your searching on?

13 A. That's correct.

14 Q. After you acquired this particular drive, what did you

15 do?

16 A. Well, the first thing I did, there are some options that

17 you can set when you acquire the drive, in terms of finding

18 carved data. I wanted to first acquire the drive and see what

19 was on the partition that came from the House of Television.

20 And after I did that, I verified that none of the files had

21 changed from the time we had picked up the drive until when I

22 had done the exam. After that I used the Forensic Tool Kit

23 data's carving capabilities and I carved for JPEGs, HTML web

24 pages, word documents --

25 THE COURT: You got to tell me what that means

131

1 again, I heard it, I forgot, tell me what that means?

2 THE WITNESS: Typically, on a hard drive all of the

3 files are referenced in a table of contents on the drive, it

4 says here's where the file is. Well, when you delete a file,

5 it removes it from the table of contents. But the file is

6 still on the drive, it doesn't actually go and remove the file.

7 So when you carve data, what you do is look in this unallocated

8 space that's considered to be empty space, and the data carving

9 looks for patterns that indicate a certain kind of file. JPEGs

10 will have a certain pattern at the beginning of a file. Web

11 pages will have a certain pattern. And it carves the data,

12 basically, from the empty space. Okay.

13 THE COURT: Thank you.

14 THE WITNESS: Sure.

15 BY MR. PATTON:

16 Q. After you carved the data -- let me ask you, were you
17 able to actually carve any data from the unallocated space on
18 this drive?

19 A. Yes, actually I was able to carve 130,000 files.

20 Q. So these are files that are in the unallocated space on
21 the hard drive?

22 A. That's correct.

23 Q. But the data in those files is still recoverable using
24 the data carvings?

25 A. Using Forensic Tool Kit certainly.

132

1 Q. Can you give a breakdown of those different files?

2 A. Yes, certainly I can. Of the files that I found that
3 were unallocated from previous users, there were four AOL buddy
4 lists. There were 16,138 byte MAP files, which are a type of
5 image. There were 20 EMF files, which are kind of a windows
6 file that we were able to find. There were 32,773 JIF files,

7 which are another kind of Internet image. There were 18,904
8 web pages, HTML files. 62,621 JPEGs, which we've discussed
9 before. And 176 Adobe Acrobat files.

10 Q. Now, does Forensic Tool Kit allow you to -- let's focus
11 on the JPEG files, does it allow you to view the JPEG files
12 that the program has carved out in unallocated space?

13 A. Yes, it does.

14 Q. When you're using Forensic Tool Kit, does the program
15 itself keep a record of all the different things you're doing
16 as you're doing it?

17 A. Yes, actually Forensic Tool Kit, from the moment you
18 start it, keeps a log file beginning with when you begin to
19 acquire it and every so many seconds it goes back and adds to
20 the log file.

21 Q. Does the log file -- would a review of the log file give
22 you an indication of what the forensic examiner has asked
23 Forensic Tool Kit to do and the results?

24 A. Yes, it would.

25 Q. Is that automatically generated by Forensic Tool Kit?

1 A. I believe it's by default turned on, yes, I think you

2 have to turn it off in order to not log.

3 Q. If you want to, can you print that log out to preserve a

4 step by step?

5 A. You could print it out or you could save it somewhere,

6 yes.

7 Q. Now, does Forensic Tool Kit also have built into it

8 processes that allows you or allow the program to write up what

9 I would call reports for your use as a forensic examiner?

10 A. Yes, it does. Typically, as the agent mentioned, you

11 flag certain files and say bookmark them and then you say

12 generate a report at the end. It takes about two minutes.

13 Q. Could you show the judge what one of those reports would

14 look like?

15 A. Certainly. Your Honor, if you'll push the button for the

16 judge. It generates the report in HTML format; in other words,

17 it generates it as a web page. So you can browse through the

18 list of files and preview them.

19 Q. Does the user have to put in the case number, case

20 location, case description, things of that nature?

21 A. Yes, when you start Forensic Tool Kit, you put that

22 information in. You say begin a new case and it will ask you

23 what's the name of the case, what's the case number, where do

24 you want to save this file.

25 Q. Did you create a report that contains some of the JPEG

134

1 files that you found on the hard drive?

2 A. Yes, I did.

3 Q. Could you show us that?

4 A. Certainly. Okay, this is the report, and this is not all

5 of the JPEGs that were found, these are just the ones I flagged

6 and saved these.

7 Q. So you put in the report you have to, when you're

8 reviewing the JPEGs that you carved, you have to somehow --

9 A. Just check a box.

10 Q. Check a box, and then when you click the button that says

11 create a report --

12 A. You would check the box and then you would click the

13 button that says bookmark these items and give it a name, and

14 then it is automatically included in the report.

15 Q. And just, for example, the first item that's on the

16 screen there --

17 A. Certainly, that's a thumbnail of the actual document if I
18 click on the link next to it. This takes a few moments, that's
19 the actual file.

20 Q. This is an icon for Dell computers?

21 A. That's right.

22 Q. If you click that, if you scroll that, that has
23 information on where on the hard drive that was found?

24 A. That's correct. If you'll notice it mentions that it's
25 drive free space. So it assigns that name because it found the

135

1 file, it doesn't know the file's name or the date or time it
2 was accessed.

3 Q. Mr. Ganley, in addition to just looking for JPEGs and
4 HTML files, did you take steps to try and see if you could
5 identify prior users of the computer?

6 A. Yes, I did.

7 Q. Is that something you can just ask Forensic Tool Kit to
8 do or do you have to try and come up with some strategies to
9 try and come up with that information?

10 A. Well, kind of both. You can certainly do text searches

11 for particular names. But you can also look at the files you

12 carved and try to discern what e-mails addresses were used on

13 those pages, what log in or account names are on those images.

14 And then research those account names in order to find who the

15 people are.

16 Q. Were you able to identify some of the prior users of

17 this?

18 A. Yes, actually I found three prior users and some

19 additional log-in names for people that I didn't find who they

20 actually were.

21 Q. How did you do that?

22 A. Well, I searched through the web pages and I found some

23 Yahoo profiles. I found some information that -- documents

24 that they left there. One gentleman actually left a scanned

25 copy of his driver's license on his drive.

1 Q. How far back in time were you able to go?

2 A. I actually have found some files that are web pages that

3 were dated 17 months prior to us renting the computer.

4 Q. Were you able to find e-mails or chats?

5 A. Yes, I was.

6 Q. How were you able to locate those?

7 A. Most of those were done, if people use Yahoo mail or AOL

8 mail, typically those are web pages, so they were carved out

9 with the HTML data.

10 Q. Now, to locate the prior users, did that take some effort

11 on your part to seek out that information?

12 A. Yes, it did. I had to browse through the web pages and

13 look for information and then do a little more research to

14 locate the people.

15 Q. This wasn't something you could determine just from going

16 through and looking at, for example, the JPEGs that got carved

17 out?

18 A. No, not at all.

19 Q. For example, if you scroll through the HTML sites that

20 you had carved out, to look for any traces of information

21 there?

22 A. Yes, I did.

23 Q. That would take some additional effort on the part of the

24 examiner, is that correct?

25 A. That's correct.

1 Q. When a computer is restored, when the operating system is
2 restored --

3 A. Okay.

4 Q. Does that actually rewrite the operating system, like say
5 if you're running Windows XP, does that physically now write
6 Windows XP again on the hard drive?

7 A. Are you speaking in particular with these computers?

8 Q. Yes.

9 A. With these computers what I found was that there are
10 actually two partitions on the hard drive. One partition is
11 the image that they use to restore and then the other partition
12 is what the users actually see. So I think this would come
13 back to the House of Television, they would run the program and
14 it would take the first partition and just dump it on top of
15 the second one, essentially.

16 Q. A certain amount of the hard drive is going to be taken
17 up with the files accompanying the operating system, is that
18 correct?

19 A. That's correct.

20 Q. When you restore the image, are those files going to be
21 written back on pretty much the same place on the hard drive?
22 A. Yes, they will. Because you always start on a hard drive
23 on an area called the boot sector, which is where windows,
24 where the hard drive has to look to start windows. So it will
25 start from there and add that data right back over top, for the

138

1 most part, of where originally it was.

2 Q. So assume that a person had a computer, used it for
3 accessing the Internet, word processing, whatever, and then you
4 restored this image on it?

5 A. Okay.

6 Q. Is restoring the image going to write over the top of
7 these other images that are on the computer, like say pictures
8 or documents or things like that?

9 A. Generally not, because before the person started working
10 on the computer that image was there. So when they create a
11 new file, it would had to have been put on another part of the
12 drive.

13 Q. When images get -- say if you wanted to save a series of

14 images to a hard drive?

15 A. Okay.

16 Q. And say that you find the images or take the images with

17 a web cam and put them on your hard drive and save them on your

18 hard drive --

19 A. All right.

20 Q. Will those images be necessarily stored sequentially on

21 the hard drive one after the other?

22 A. No, not necessarily. Because what happens is the windows

23 looks for, the operating system looks for whatever space is

24 open. And in fact, a file, one file may actually be located,

25 pieces of it in three different locations on the drive. It's

139

1 called defragmenting your drive. You typically want to go back

2 at some point and bring those files together. But the first

3 time you write that file it may be put in three different

4 locations.

5 Q. Even if you defragment the drive and bring that one file

6 that's in three locations back into the same location, it's not

7 necessarily going to take the second image and put it right

8 next to the first image on the hard drive?

9 A. That's correct.

10 Q. So these images, say even if you have images saved in My

11 Photos folder on windows --

12 A. Okay.

13 Q. So when you open the folder, you see thumbnails of all

14 those images -- are those images stored sequentially in the

15 same place on the hard drive?

16 A. No, there is no rhyme or reason as to why they would.

17 Q. They can be anywhere on the hard drive?

18 A. Yes.

19 Q. So if one of the images was deleted, then overwritten in

20 the unallocated space, it doesn't necessarily mean that the

21 other ones are going to be overwritten?

22 A. That would be correct.

23 Q. In your opinion, if I stored 13 different digital images

24 onto my hard drive, and then say it was a rented computer,

25 returned the computer, the operating system gets restored and

1 the computer is re-rented, it's used for nine days by the new

2 person --

3 A. Okay.

4 Q. In your opinion, is it likely that all of those 13 images

5 that are in unallocated space will be overwritten in a nine-day

6 period?

7 A. No, I wouldn't expect them to be, no.

8 Q. If you ran Forensic Tool Kit to look for those photos --

9 A. Okay.

10 Q. And you carved all the data, searched for the photos,

11 searched for the images, I guess I should say, and you didn't

12 find them anywhere or even a portion of them and, again, this

13 is assuming that you are using the computer that's been

14 returned and re-rented for nine days, what conclusion would be

15 drawn as to whether or not those images had ever been on the

16 hard drive?

17 A. Well, my first conclusion would be that the images had

18 never been there. That those files never existed on that

19 computer.

20 Q. Forensically examining a computer, if you develop some

21 question as to whether or not you had the right computer, would

22 you take steps to try and resolve those questions in your mind?

23 A. Certainly I would. And certainly a phone call to the
24 rental company would be the first thing I would do. But I
25 would also look at all of the account names that I could find.

141

1 Maybe they didn't match the person I thought it was. Most
2 people have more than one e-mail address these days. People
3 change their e-mail addresses. People's friends, e-mail, the
4 buddy lists that are on the computer, you ought to be able to
5 figure out who those people are by going to AOL and saying who
6 are these people and maybe you can connect them by connecting
7 their friends.

8 Q. So even if the name, even if you search through the
9 carved data for the first name or the last name of the person
10 you thought had rented the computer and didn't find their first
11 or last name, would that lead you to conclude forensically
12 there is no way you can establish these people had ever had
13 possession of the computer?

14 A. I mean that certainly wouldn't be enough to establish
15 that I had the wrong computer or that I couldn't connect them,
16 that would not be enough.

17 MR. PATTON: Those are my questions, your Honor.

18 THE COURT: Mr. Hadley.

19 MR. HADLEY: Couple questions, your Honor.

20 CROSS-EXAMINATION

21 BY MR. HADLEY:

22 Q. Mr. Ganley, Attorney Michael Hadley.

23 A. Hi.

24 Q. You told us about your experience and training in how to
25 conduct a forensic examination. I just want to ask you to

142

1 precisely in conducting a forensic examination of a hard drive,

2 how important is it to be sure you have the right hard drive?

3 A. I think it would be the most important thing to do would

4 be to make sure you have the right hard drive. I mean, you

5 waste an awful lot of time, it takes over a day to acquire the

6 drive. And why would you waste all that time if you didn't

7 have the right one to begin with.

8 Q. In your professional opinion, would the failure to find

9 the type of images for which you were searching, would that

10 lead you to conclude that you had the wrong hard drive?

11 A. That would not be the first thing I would conclude, no.

12 Q. If in fact you did come to the conclusion that you were

13 sure you had examined the wrong hard drive, in your

14 professional opinion what should a forensic examiner do?

15 A. Well, I think a forensic examiner would at least go back

16 and verify that with the House of Television and try to locate

17 the actual drive. And, in addition, I guess my first reaction

18 would be the whole basis of this is that people who collect

19 child pornography save it in other places. I would be going

20 back with a search warrant for the house of the defendant to

21 see if he kept copies on CD's or a USB drive or a floppy drive.

22 Q. Mr. Ganley, you were present in the courtroom when

23 Detective Lynn testified, correct?

24 A. Yes, I was.

25 Q. You heard her testimony?

143

1 A. Yes.

2 Q. And you were here when a Mr. Culhane, the manager of the

3 House of Television testified?

4 A. Yes, I was.

5 Q. In your professional opinion, did Detective Lynn have
6 enough information to conclude she had the wrong computer?

7 A. Well, not knowing because there was no log report, there
8 was no Forensic Tool Kit report, based on her testimony I would
9 say no.

10 MR. HADLEY: Thank you, no further questions, sir.

11 THE COURT: Mr. Trabold.

12 CROSS-EXAMINATION

13 BY MR. TRABOLD:

14 Q. Sir, how many child pornography investigations have you
15 conducted?

16 A. How many drives have I examined?

17 Q. No, how many child pornography investigations have you
18 conducted?

19 A. Well, I guess I'm not sure I understand --

20 Q. My point is you're not a law enforcement officer,
21 correct?

22 A. No, I'm not.

23 Q. You're the Public Defender's IT person?

24 A. That's correct.

25 Q. Okay. So you're not really qualified to comment on what

1 steps a law enforcement officer should take with regard to a

2 law enforcement investigation?

3 A. No, I would agree with you that that's the case.

4 Q. You would agree with me, like the last witness agreed

5 with me, that different hard drives may have different

6 qualities, in the sense that one hard drive may have some

7 defects that another hard drive may not have?

8 A. Actually, I would disagree with that, and I'll tell you

9 why. Hard drives are manufactured in sterile conditions

10 because these things actually have billions and billions of

11 bytes of data they have to move at speeds of 7,200 rpm's. The

12 quality control on hard drives is so strenuous, that I don't

13 agree with him.

14 Q. Are you saying, then, as you maintain the computers for

15 the Public Defender's office that you have never encountered a

16 computer that, for whatever reason, you just have to get rid of

17 because it doesn't work very well or might have problems?

18 A. No.

19 Q. You've never encountered that situation?

20 A. No.

21 Q. Every computer you dealt with in the course of your
22 computer career has functioned in a way it was supposed to
23 function?

24 A. First of all, computers are component based, which means
25 when the hard drive fails, you get a new one. If the network

145

1 part of it fails, you get a new one. I never had a computer
2 that just was flaky and I had to throw it away.

3 Q. Well, my point is you have encountered hard drives that
4 don't perform in a way they're supposed to perform and you had
5 to get a new one?

6 A. Over time, yes. Certainly everything breaks. But if
7 you're saying hard drives are kind of flaky or weird or they're
8 not the same, all hard drives are essentially operated at very
9 strict tolerances, otherwise they don't get sold. You got a
10 hard drive that is spinning around that fast and you have to
11 find your file, there are six platters, it's spinning around
12 7,200 rpm's and your hard drive has to find it in a matter of
13 seconds.

14 Q. You didn't do anything to the Eberle's actual computer in

15 this case, correct?

16 A. That's correct.

17 Q. So you have no information to share with the court as to

18 what actually went on with the hard drive, that was the hard

19 drive we're talking about here today?

20 A. That's correct.

21 Q. And you were here when the detective testified that she

22 found information on the hard drive similar to the information

23 that you testified you found on the hard drive you dealt with,

24 correct?

25 A. That's correct. But she also didn't say what information

146

1 she found of any users.

2 Q. Well, she said she found -- information from users

3 unrelated to that -- that she took to be unrelated to the

4 Eberles, correct?

5 A. No, she said she found no evidence that tied the computer

6 to the Eberles.

7 Q. But she also testified that she found other information

8 that she took to be for other users?

9 A. Well, she said that she found files, she didn't just say
10 who they were tied to.

11 Q. But she said that she didn't think they were from the
12 Eberles?

13 A. She said she couldn't tie them to the Eberles.

14 Q. Which would be information similar to what you found for
15 computer users on your computer that you're testifying here
16 today about?

17 A. Well, except I have been able to tie some files to some
18 users. I guess my point is what she didn't say is I found
19 evidence of some other user who owned this, so I thought that
20 this computer belonged to somebody else. She just said I
21 couldn't tie it to the Eberles.

22 Q. But she did say that she found information on the
23 computer?

24 A. But she couldn't say that the Eberles didn't put it
25 there.

1 Q. Okay. And that has something to do with -- what does
2 have to do with anything?

3 A. Well, I guess my point is I think if you take the time to
4 look at all of the files that are on the drives, you're going
5 to find some evidence somewhere of somebody who actually used
6 this computer. You're going to find either log-in screens,
7 you're going to find e-mail messages, you're going to find
8 chats. I found three previous users on this hard drive.

9 Q. Yeah, on that hard drive?

10 A. Yeah.

11 Q. You didn't look at the Eberle's hard drive?

12 A. No, but I found three previous users. That means one
13 person owned it, returned it to rent a center. Somebody else
14 rented it, returned it to rent a center. One person is from
15 Corry, PA. One's from Union City. They weren't in the same
16 house. They didn't overwrite each other's data.

17 MR. TRABOLD: Nothing further your Honor.

18 THE COURT: Anything else?

19 MR. PATTON: Yes, your Honor.

20 REDIRECT EXAMINATION

21 BY MR. PATTON:

22 Q. If Detective Lynn had printed out the Forensic Tool Kit
23 log of her examination of the computer she received from the

24 House of Television, would you be able to review that and then

25 be able to have some knowledge about what in fact was done to

148

1 that drive?

2 A. Yes, actually if the Forensic Tool Kit log was printed

3 out, you could follow step by step what the examiner did and

4 what time.

5 Q. And you can't look at the hard drive from the Eberle's

6 computer they got from the House of Television because we

7 physically don't have it, correct?

8 A. That's correct.

9 Q. But if Ms. Lynn had printed out the Forensic Tool Kit log

10 of her examination of that computer, everybody would be able to

11 tell exactly what she did, correct?

12 A. That's correct.

13 MR. PATTON: Those are my questions.

14 THE COURT: Thank you, sir, you're excused. Your

15 Honor, I'd call Ian Chisholm.

16 MR. TRABOLD: Your Honor, may I have an offer of

17 proof?

18 MR. PATTON: Mr. Chisholm is a forensic computer
19 expert, he is actually the forensic computer expert that we've
20 hired. He has reviewed the hard drive of the computer that
21 forms the basis of Counts Three and Four. He also reviewed the
22 hard drive from the House of Television. He's also going to
23 have some testimony regarding reasonable conclusions that can
24 be drawn based on findings made during the forensic computer
25 examination. And I'll put it to you this way. Before today we

149

1 had no idea what Detective Lynn was going to say she did or
2 didn't do to this computer that she searched in September of
3 '04. She didn't have any reports from it. I had no idea what
4 she was going to say.

5 THE COURT: Let me ask the question this way. Tell
6 me again, by way of restating your offer of proof, what Mr.
7 Chisholm will say that is germane to the issue of the
8 sufficiency of the probable cause?

9 MR. PATTON: Well, he is going to give testimony
10 about what steps you could look at to try and forensically link
11 a computer to a particular user. What steps, if a forensic

12 examiner has doubts about whether they're looking at the right

13 computer, what steps would then be taken. And what reasonable

14 inferences or conclusions could be drawn from a forensic

15 examination of computers.

16 THE COURT: All right. Sir, spell your name for my

17 court reporter?

18 THE WITNESS: Last name Chisholm, C-h-i-s-h-o-l-m,

19 first name Ian.

20 IAN CHISHOLM, DEFENSE WITNESS, SWORN

21 DIRECT EXAMINATION

22 BY MR. PATTON:

23 Q. Mr. Chisholm, how are you employed?

24 A. I'm self-employed, sir.

25 Q. As what?

150

1 A. As a computer forensic expert.

2 MR. TRABOLD: I'm sorry, I didn't hear that, I

3 apologize.

4 THE COURT: Mr. Chisholm, speak into the microphone.

5 THE WITNESS: I'm self-employed, computer forensics

6 and data recovery. And also Internet investigations.

7 THE COURT: Is that an Australian accent?

8 THE WITNESS: It's British, sir.

9 BY MR. PATTON:

10 Q. Could you give the judge a general idea of the type of
11 work you do in your business?

12 A. It's recovering data off of hard drives or forensically
13 examining hard drives for data or evidence.

14 Q. Is the data recovery more along the lines of somebody
15 calling up and saying oh my God, my computer crashed, help?

16 A. They normally say more than that, but yes.

17 Q. The forensic evaluation of computers, what experience do
18 you have doing that?

19 A. Eight years experience. Most of the cases that come to
20 court are job related.

21 Q. How many different hard drives, roughly, have you
22 forensically examined in child pornography cases?

23 A. In child pornography, in the hundreds, over a hundred.

24 Q. And have you testified in court before as an expert?

25 A. Yes, I have.

1 Q. In what courts have you testified?

2 A. Pittsburgh federal court, it was U.S. versus -- I can't

3 pronounce the name -- it's an Indian name, I can't pronounce

4 it. But there are other cases that I have done. But it hasn't

5 gone to trial.

6 Q. Did my office FedEx you a hard drive from the House of

7 Television?

8 A. Yes, sir.

9 Q. And did you do a forensic examination of that hard drive?

10 A. I did, sir, yes.

11 Q. Were you able to recover data from the unallocated space

12 of that hard drive?

13 A. Yes, I did, sir. And the hard drive that you provided to

14 me had been provided to you and not used after you received it.

15 Q. Can you give us an idea of the amount of data that you

16 were able to recover in the unallocated part of the hard drive?

17 A. The recovered files, deleted files that were on the hard

18 drive prior to the re-installation of the operating system

19 amounted to hundreds of thousands.

20 Q. Were you able to develop at least some information to try

21 to identify prior users?

22 A. Oh, yes, many user names and instant messenger chat logs.

23 Q. Could you just give an explanation of the steps you take

24 when you are trying to identify previous users from information

25 taken from or found in unallocated space?

152

1 A. Well, normally I have an idea of a person that I need to

2 identify. In this instance I had no clue whatsoever. So I

3 carved out HTML web pages, and I searched for such terms as an

4 e-mail address. Such as ask Yahoo dot com. And then I would

5 examine that to ascertain if it was a user name -- and then I

6 would do a search using the user name on the hard drive. And

7 that would locate some users. Other users, like e-mail

8 addresses, within files which may be e-mail files that were

9 recovered, you would have data in their e-mails sent and

10 received. Telephone numbers, credit card information.

11 Q. If you were trying to identify a prior user, would you

12 try and search just using the person's first name as a search

13 term?

14 A. No, unless it was a very, very rare first name. The name

15 George, as an example, or Fred or Smith, you'll get hits in

16 dictionaries, you could get hundreds of thousands of hits. So
17 you have to isolate your search terms.

18 THE COURT: Mr. Patton, we're going to take a short
19 recess.

20 (Recess from 1:58 p.m.; until 2:10 p.m.)

21 THE COURT: Mr. Patton, before we continue, let me
22 ask a question here. To possibly shorten this up somewhat,
23 maybe not, it doesn't really matter. If for purposes of
24 discussion I were to conclude tentatively that the computer
25 that we're talking about that was looked at by the detective

153

1 was in fact Mr. Eberle's computer, does that shorten his
2 testimony?

3 MR. PATTON: Yes.

4 THE COURT: All right. Well, let's just put it this
5 way. I just planted the seed in your mind, you can pursue this
6 then as long as you want. But --

7 MR. PATTON: If you were going to make a factual
8 finding that the computer Detective Lynn --

9 THE COURT: Let me put it this way. I haven't sat

10 down to write the findings of fact yet, but I'll be quite
11 candid. Absent a significant change of heart or new evidence,
12 in all likelihood that's a finding that will be made.

13 MR. PATTON: I do have some questions to ask based
14 on, if I could, with Mr. Chisholm on that issue.

15 THE COURT: Take it for what it's worth and gauge
16 your time accordingly.

17 MR. PATTON: Yes, your Honor.

18 BY MR. PATTON:

19 Q. Mr. Chisholm, as a forensic examiner, if you are told you
20 have Mr. X's hard drive and it is established that the hard
21 drive you have is Mr. X's, and you're asked to look for
22 identified images, where you have the hash for those images,
23 you have the file names for those images and you look for the
24 images and despite all your efforts you can't find the images,
25 what conclusion do you draw from those facts?

154

1 A. A drive that was used for nine days after, I would say
2 they were never there.

3 Q. The nine days after, in this case you're aware that the

4 computers that the Eberles had used and the one that Detective

5 Lynn was looking at had been re-rented and had been used for

6 nine days?

7 A. I know that, yes.

8 Q. So your comment that if it's only been used for nine

9 days, then your conclusion would be that those images had never

10 been on the hard drive?

11 A. That's correct, sir.

12 Q. Assume that even though you're told you have Mr. Eberle's

13 computer, but despite your best forensic evidence, you cannot

14 find anything forensically where you can say okay, I have

15 George Eberle logging on to e-mail or I have him chatting, but

16 you are told look, this is George Eberle's computer, can you,

17 based on your forensic evaluation, say no, I don't have George

18 Eberle's computer?

19 A. No, I can't.

20 Q. As a forensic computer examiner, before you sit down, are

21 you able to know how a particular person has used their

22 computer?

23 A. Before getting the hard drive?

24 Q. Right.

25 A. No.

155

1 Q. And is it possible that somebody rented a computer and
2 either didn't use it or just used it very, very rarely or
3 virtually not at all?

4 A. That's possible.

5 Q. But if you were told I got Eberle's computer and even
6 assume you looked hard for evidence to try and link it to the
7 Eberles but you couldn't do it, but you knew these images you
8 were looking for, hash file names --

9 A. Sizes, dates.

10 Q. Everything, and you didn't find those images, your
11 conclusion would be the images were never on the hard drive?

12 A. That's correct, because there's other references upon the
13 hard drive to where the files were. You have file names and
14 link files and log files. So certainly if I found nothing, I
15 would determine nothing was there.

16 Q. In the other cases where you've examined hard drives in
17 child pornography cases, the ones where you actually found
18 child pornography, did you find just one or two images of child

19 pornography?

20 A. More like hundreds. All filed in folders of specific

21 names related to the type of image.

22 MR. PATTON: Those are my questions, your Honor.

23 THE COURT: All right. Mr. Hadley.

24 MR. HADLEY: Based on what we heard earlier, I don't

25 have any questions.

156

1 THE COURT: All right. Yes, sir.

2 MR. TRABOLD: Just briefly, your Honor.

3 CROSS-EXAMINATION

4 BY MR. TRABOLD:

5 Q. Sir, how many times have you testified for the

6 prosecution or the government?

7 A. About three in federal court.

8 Q. Federal court did you say?

9 A. Yes.

10 Q. And that would down in Pittsburgh?

11 A. In Pittsburgh, yes.

12 Q. So when you testified in federal court in Pittsburgh, did

13 you testify, those three times, just so I'm clear, were those

14 for the Federal Defender's office or for the United States?

15 A. Defender's office. Or separate lawyers, but not for the

16 government.

17 Q. Have you ever been retained by the government to testify

18 as a prosecution witness?

19 A. In the UK I had, but certainly not forensic wise.

20 Q. Just so I'm clear, is it accurate to say that you have a

21 lengthy background in -- I'm probably not phrasing this

22 correct, but sort of like a Secret Service, the United

23 Kingdom's Secret Service version, would that be accurate?

24 A. I did work for the government, sir, yes.

25 Q. So much so that you provided protection to members of

157

1 British royal family, things like that?

2 A. Yes, sir.

3 Q. Subsequent to that you come over to the United States

4 and --

5 A. I worked shortly for the foreign commonwealth at various

6 embassies and then came here.

7 Q. Incidentally, in this case here, what's your expert

8 witness fee?

9 A. My fee?

10 Q. Yes, sir.

11 A. I believe it's \$250 per hour.

12 Q. How many hours have you billed the government for?

13 A. On this particular case?

14 Q. Yes.

15 A. I can't recall, to be honest. It's significant.

16 Q. And just so the record is clear, you have forensically

17 examined the second Eberle computer, but not the first one?

18 A. Are you talking Detective Lynn's one?

19 Q. Let me see if I can rephrase that so you understand what

20 I'm talking about. The one that forms the basis of the charges

21 we're here on today where there were actual images of child

22 pornography found, you went to the FBI and actually examined

23 that computer?

24 A. That's correct, sir.

25 Q. But the first one where there's a claim nothing was found

1 on, you didn't have an opportunity to look at that?

2 A. Not at all, sir.

3 Q. The House of Television computer?

4 A. I have not seen that one.

5 Q. And you don't have a basis to dispute the detective's

6 factual account that when she looked at that first computer,

7 the House of Television computer, for lack of a better word,

8 that she didn't find any evidence of child pornography, nor did

9 she find any evidence that the computer or any documentation

10 linking that computer to the Eberles?

11 A. Oh, no, I can't dispute anything that she said.

12 MR. TRABOLD: Nothing further, your Honor.

13 REDIRECT EXAMINATION

14 BY MR. PATTON:

15 Q. If Detective Lynn had printed out the log sheet that the

16 Forensic Tool Kit would have created while she was examining

17 the computer back in September of 2004, could you have then

18 reviewed that to give an opinion as to the thoroughness and the

19 quality of the work she did then?

20 A. I could make a determination of that, yes.

21 Q. But you can't dispute Detective Lynn because you don't

22 have any --

23 A. I don't have nothing to refer back to, no.

24 MR. PATTON: Those are my questions, your Honor.

25 THE COURT: All right, sir, thank you very much.

159

1 THE WITNESS: Thank you, sir.

2 MR. PATTON: That's the evidence I have to present

3 on behalf of Mr. Eberle, your Honor.

4 THE COURT: All right.

5 MR. HADLEY: We join in the evidence for Alesha

6 Eberle, we nothing in addition, your Honor.

7 THE COURT: All right. Couple of housekeeping

8 matters here. Was there some question about these Internet

9 chats and how many I'm supposed to get?

10 MR. HADLEY: If it please the court, Attorney

11 Trabold and I have spoken, since he has the copy machine here,

12 agreed if the court hears argument, he'll get them to you

13 within a day or so, photocopies.

14 THE COURT: All right. That's the testimony, those

15 are the exhibits, then, it would be helpful for me, once I get

16 this transcript and start reflecting on it, that I have an

17 opportunity to read what you have to say by way of brief

18 summary. Do you have something that you want to say, Mr.

19 Patton?

20 MR. PATTON: Your Honor, the entire basis of finding

21 probable cause to search the computer in the Eberle's home in

22 March of 2005, is the claim that back in September, at the

23 latest, September 2, 2001, George Eberle put these images up to

24 Yahoo and, therefore, they were on his hard drive. And because

25 he's a child pornographer, he'll never destroy these images

160

1 willingly. But it also puts in there that even if he does

2 delete them, we can find them through forensic software

3 programs. And that even if he gets new computers, these images

4 are going to be on the hard drive of every computer he uses

5 because before he gets rid of the old computer, he'll save it,

6 and then when he gets the new one, he'll actually put it on the

7 hard drive of the new one. But, your Honor, if you then get

8 one of George's computers, run the forensic software on it, and

9 you don't find the pictures, that claim goes out the window.

10 And you heard Mr. Ganley and Mr. Chisholm say yeah, the thing

11 had been reformatted and was re-rented out, it had been out for
12 nine days. And that these images aren't going to all get
13 overwritten, if any of them, in nine days. The government
14 papers say that it had been re-rented for approximately a
15 month, I don't know where that came from. But the evidence you
16 had presented to you today was it had been out for nine days.
17 And I don't think there's any way any reasonable law
18 enforcement officer wouldn't want -- wouldn't realize when
19 writing up the affidavit in support of a search warrant for
20 March, 2005, that it wouldn't be absolutely crucial to tell the
21 magistrate, by the way, we got one of George Eberle's computers
22 and looked for these images and they weren't on there.

23 THE COURT: In terms of Franks, this is a sin of

24 omission?

25 MR. PATTON: A material omission.

161

1 THE COURT: Is that what your point is -- let me ask
2 you this. Assuming that the detective had included the
3 information that a search of the computer failed to reveal any

4 images of child pornography. Assume that was included in the
5 affidavit. Also included in the affidavit, though, was it not,
6 was information concerning the interview by the victim. And
7 this is the crux of this case, I think. This is in my view how
8 this thing turns. My question to you is why in your view, even
9 with the inclusion of the allegedly material information, why
10 in your view doesn't the detailed discussion with the alleged
11 victim independently support probable cause?

12 MR. PATTON: Because --

13 THE COURT: To me that is the issue in the case.

14 MR. PATTON: Because the only way her testimony
15 relates to searching George Eberle's computer in March of 2005
16 is by Lynn taking that information and saying okay, these
17 images were on the hard drive of the computer. But they're
18 saying this happened back in 2001, and we're in 2005. Well,
19 let me take that back, actually in the affidavit I believe they
20 say 2002. Even though at that point Detective Lynn has the
21 information from Yahoo saying that these images got put onto
22 the Internet --

23 THE COURT: Apparently was an error.

24 MR. PATTON: It's an error, but it's an important
25 error because it makes a year difference and she got the

1 information from Yahoo that says they got put up there on
2 September 2, 2001.

3 THE COURT: Back to the original question.

4 MR. PATTON: The idea that there is probable cause
5 to search the hard drive of the computer is these images were
6 on the hard drive, were on the computer because George and
7 Alesha showed the images to the victim on the computer screen.
8 And once they're on the hard drive, they're going to stay on,
9 even though this was three-and-a-half years ago and even if
10 he's gotten a new computer, don't worry about it because he's
11 not going to get rid of it because it's child porn, and even if
12 he got new computers, he's going to save it before he gets rid
13 of the old one and put it on the new one. That's the only
14 evidence supporting the search of the hard drive. I think it's
15 important for you to distinguish between getting a search
16 warrant to search the residence of the house or CD's or drives
17 or something like that, or maybe they printed them out and so
18 they're in paper form. I don't object to any of the search of
19 anything else in the house other than the hard drive. But to

20 get probable cause to search the hard drive of the computer, it
21 is once George has it on the hard drive of the one computer,
22 it's going to be on the hard drive of every computer he then
23 gets because he's going to take it off the old one and put it
24 on the new one. He gets rid of that one, saves it, puts it on
25 the new one.

163

1 THE COURT: Sequentially you mean?

2 MR. PATTON: Yes. Apparently to infinity. If that
3 is true, those images would have been on the hard drive of the
4 House of Television computer. Detective Lynn knew or should
5 have known that those images were not on the House of
6 Television computer, therefore, it would not be reasonable to
7 believe that they were on the hard drive of the computer he got
8 in March of 2005.

9 THE COURT: Should the detective then have
10 concluded -- tell me if this is where this logically goes. Is
11 the end game of this the detective, based upon her failure to
12 have found pornography, should have concluded, after her
13 interview with this victim, that the victim was not telling the

14 truth?

15 MR. PATTON: No, she can believe the victim. But,
16 judge, the victim's talking about something that happened,
17 depending on what date you use, two-and-a-half or
18 three-and-a-half years ago. Now, the government wants to get
19 over that staleness problem by using this daisy chain argument
20 that every computer George is going to get is going to have
21 this on the hard drive. That's the only way they get over the
22 staleness problem. And importantly, also, with the search of
23 the computer from House of Television, not only are the Yahoo
24 images not found, there is absolutely no child pornography
25 whatsoever on George Eberle's computer. This is a computer

164

1 that he's had for eight months. So there is no good-faith
2 basis to then say George Eberle is a child pornographer who
3 stores his child porn on his computer hard drive. I mean, even
4 if you believe the victim that if you took these web pictures
5 of me two-and-a-half or three-and-a-half years ago, that
6 doesn't give you probable cause to search his computer in March
7 of 2005. Unless you buy the argument of, well, you're going to

8 keep it forever and move it from computer to computer to
9 computer. But if you know that that argument is not true, then
10 the probable cause for searching the computer is gone. And you
11 do not have to conclude that the victim is not telling the
12 truth.

13 THE COURT: Tell me about the severance question?

14 MR. PATTON: Judge, the severance issue in this case
15 is really important because this is wonderfully ironic after
16 Detective Lynn's testimony that child pornographers never get
17 rid of their child porn and they always keep it. The only
18 child pornography found on the computer taken in March of 2005
19 was all deleted. And except for three images, all of it was in
20 unallocated space. And it's in unallocated space, so the
21 government, at least as far as I'm aware, the government has no
22 evidence to be able to say who was using the computer at the
23 time that these images were written on the hard drive. And
24 it's going to come down to either somebody else was using it or
25 George -- the defense it's not me, it's either someone else or

1 my wife or someone else. Her defense is going to be it's him.

2 THE COURT: It's all that it could be, other than --

3 MR. PATTON: It could be a third person. They're
4 just absolutely mutually antagonistic. You now have these
5 images, these chat things coming in that are all based on
6 Alesha, not on George. And so I would submit that to avoid
7 unfair prejudice to George, that the trials should be severed.

8 THE COURT: All right, thank you.

9 MR. PATTON: Judge, I just want to distinguish the
10 one case the government cites in support of its argument, it
11 had to do with a drug sniffing dog and saying that, well, the
12 dog had sniffed on a suitcase and had not alerted and didn't
13 include that fact in their search warrant application --

14 THE COURT: Back on the suppression issue?

15 MR. PATTON: Yes. The Third Circuit said, well, it
16 was okay he didn't say it because if you want to put the fact
17 in that they didn't alert, you would also put in the fact,
18 well, you know, people can mask the smell of the drugs. Well,
19 in this case part of what Detective Lynn is trying to convince
20 the court, after this long period of time, with the forensic
21 software stuff we can find the deleted stuff. And when she
22 went and got the computer at the House of Television, she knew

23 it had been re-rented, she knew it had been reformatted, but
24 she still was like, hey, I can use my forensic software stuff
25 to find what's been now deleted. And in fact did find a lot of

166

1 stuff. So this case that the government cites has nothing to
2 do with this, because Detective Lynn can't say, well, if it's
3 been deleted, I can't find it. The whole point of getting the
4 House of Television warrant was even though it's been deleted,
5 I can get it. So that case just has no relevance.

6 THE COURT: Thank, you Mr. Patton. All right, Mr.
7 Hadley.

8 MR. HADLEY: If it please the court, on the search
9 warrant, just briefly, I believe Mr. Patton went through it
10 thoroughly. But to my mind, I think the easiest way to vision
11 this thing is if Tiffany had said to the police in 2005, if she
12 had not said I was sexually assaulted and pictures were taken,
13 but instead had said in either 2001 or 2002, I had seen George
14 and Alesha smoke marijuana, I think we'd all agree that in '05
15 there's not probable cause to go back and get a search warrant
16 based on what she may have seen in '01 or '02. So the

17 government attempts to breach the staleness in the absence of
18 probable cause because of the staleness by saying this is some
19 kind of unique crime, this is different than anything else.
20 Which three-and-a-half years later no reasonable person would
21 suspect evidence to be in a place where the government armed
22 with a warrant would go in three-and-a-half years later. They
23 try and get over that by laying out the uniqueness of this
24 crime in their opinion except the evidence that Detective Lynn
25 had is this connection or daisy chain, as Mr. Patton called it,

167

1 doesn't exist. The trail runs dry in September of '04, and
2 they're done, it's got to end right there. Especially when
3 you're trying to overcome staleness to begin with. So you
4 create a special category. But that special category of sex
5 offenses falls apart. So it needs to be in there. And no
6 magistrate, no one would form probable cause if the omitted
7 material had been there because you would have concluded that
8 the trails run dry, he's not keeping it, they're not keeping
9 it, it's stale, we're not going to execute a search warrant.
10 Judge, on the severance issue. You know, obviously,

11 the defendants are going to be pointing fingers at each other.

12 We're going to say it's George, they're going to say it's her

13 or a third party. There's some --

14 THE COURT: You don't have to commit to this and I'm

15 not even sure -- well, it could be germane. But have you made

16 a decision at this point in time as to whether your client is

17 going to testify?

18 MR. HADLEY: I haven't made that decision, that's

19 one of those game-day decisions, your Honor, you just play it

20 by ear. I can't tell you one way or the other. Obviously,

21 with Counts One and Two out, it does make it a little

22 different. But you're going to have them pointing the finger

23 at each other.

24 THE COURT: On the severance issue, though, as laid

25 out in Mr. Patton's brief, he's feeling that his client's, that

168

1 the ox of his client is being gored more than yours because of

2 your client's Internet chats, isn't that right?

3 MR. HADLEY: If you let those in and I'll argue that

4 in a moment, if I may, yeah, I think that's his position. And

5 I'm indifferent, you want to sever them and need to sever them,

6 we're not objecting to that. I just noticed today --

7 THE COURT: Are you joining -- that's a sloppy way

8 of asking the question, do you want a severance, too?

9 MR. HADLEY: Yes, we do. I'll tell you one other

10 thing, if I may. Just learning it today, when you got two

11 attorneys there, one guy goes and asks all the questions of

12 Detective Lynn, there's not a whole lot left for me to do for

13 my client. Just as a practical matter, it kind of looks like

14 your client is not getting represented as well. Whoever gets

15 to go first --

16 THE COURT: Mr. Patton is a hard act to follow.

17 MR. HADLEY: Exactly. That's part of it.

18 THE COURT: We could reverse it. Let's talk about

19 your motion in limine?

20 MR. HADLEY: Judge, as we agreed, you'll get the

21 full chats to review. There is no admission of wrongdoing, of

22 criminal activity at all in any of these things. This is just

23 a stigma of certain admissions, certain discussions, and

24 talking about pornography, totally legal. It's all adults.

25 The best example I can think of to help the court grasp this

1 one is --

2 THE COURT: Everybody tries to help me grasp things.

3 MR. HADLEY: Just imagine, Judge McLaughlin, if you
4 were falsely charged with bank robbery, a federal crime, a bank
5 robbery. And the government, to prove their case, wanted to
6 introduce evidence that, well, Judge McLaughlin, you know, he
7 has a bank account. He goes in the bank and transacts
8 business. We want to introduce that as some kind of proof that
9 he robbed the bank. Now, that would be I think inadmissible in
10 any court, just as this would. They're trying to prove that my
11 client illegally possessed child pornography and to prove this,
12 they're going to say she had legal adult conversations with
13 another person. It doesn't add up, it doesn't fit, and there
14 is a lot of stigma. It wasn't hard to go back and find, we all
15 know, I don't think there's any dispute, homosexuality, she
16 admits to, bisexuality, creates great stigma. And when you get
17 a chance to look at these, they don't lend anything to the
18 evidence and they should be kept out. Thank you, your Honor.

19 THE COURT: Okay, Mr. Trabold.

20 MR. TRABOLD: Your Honor, if I could just take these

21 in reverse order. With regard to the chats first. These are
22 chats where this defendant, Alesha Eberle, talks about viewing
23 pornography on the Internet, indicates that she's bisexual, and
24 indicates that she's in teen chat rooms talking to teenagers.
25 They're clearly relevant in this case. And the legality of the

170

1 conversations has nothing to do with it.

2 THE COURT: This is 404(b) stuff under the
3 exception?

4 MR. TRABOLD: It is not 404(b), the government is
5 contending it is not 404(b) because -- the chats are statements
6 that are intrinsic to the crimes themselves. They are chats
7 which occur, at the very most, a month or two time difference
8 from when the child pornography that's at issue in this case,
9 is actually put on the computer. Our point is simply this.
10 The chats show a variety of things. Number one, they show that
11 this defendant is interested in pornography. Which is
12 something I need to demonstrate to the jury because, obviously,
13 if she's not interested in pornography, she's not going to be
14 interested in child pornography. Number two, and equally as

15 important, it shows that she's on the computer, that she's
16 using the computer, that she's skilled at using the computer
17 around the time when these child pornography images are out put
18 on the computers.

19 Finally, there's a chat in there where she talks
20 about being in a chat room, talking to minors in the chat room,
21 and it's an underage teen chat, which is clearly relevant to
22 this case because you're talking about underage sexual
23 photographs that were put on their computer.

24 This is not 404(b) evidence because they are
25 statements right from the defendant occurring right around the

171

1 time of the occurrence of these offenses.

2 THE COURT: You're saying it's relevant evidence,
3 for instance, on the issue of intent?

4 MR. TRABOLD: Correct. By her saying in a chat to
5 her brother -- something to the effect that I'm on looking at
6 pornography. That shows that she has an interest in
7 pornography and, therefore, is the necessary first step that I
8 need to establish with regard to her intent to look at and

9 download, receive, possess child pornography.

10 THE COURT: What about the severance?

11 MR. TRABOLD: Judge, the case law is overwhelmingly

12 clear that antagonistic defenses is not a basis to sever.

13 Otherwise, almost every case where there are co-defendants

14 would be severed. It's black letter law that antagonistic

15 defenses is not a basis to sever. In fact, I think it's the

16 Zafiro case, cited by the defense, lays out in very stark terms

17 what are the only real three reasons to sever defendants in a

18 case like this. One is if it's a complex case. This is not a

19 complex case, it's not even close to being a complex case.

20 Number two is in the Bruton type case, which now that Counts

21 One and Two are not an issue in this case. Number three is if

22 there's evidence that exculpates one defendant will be

23 unavailable if they testify together. And that also is not the

24 case. So none of the three examples contemplated by the

25 Supreme Court and the Third Circuit are relevant to this case.

1 And antagonistic defenses are not enough for you to sever.

2 Just because a defendant wants a separate trial so they can

3 point at their wife and says she's the one that did it, does

4 not form the a basis under federal law to severe a case.

5 Finally, with regard to the issue of suppression.

6 The case law instructs you to first go to the issue of good

7 faith under Leon, and resolve that issue first. Because if you

8 resolve that issue in favor of the government, there is no

9 reason to go any further. And it's our position that you can

10 resolve this case under good faith and you can resolve it even

11 without relying on good faith. But I'll talk about good faith

12 first.

13 First, your Honor, the whole basis for the

14 good-faith exception under Leon is that we want to deter police

15 misconduct by excluding evidence that they obtain which would

16 be of value. That's basically the basis for the exclusionary

17 rule, to protect people's Fourth Amendment rights by excluding

18 evidence in the hopes that police misconduct is deterred. My

19 question in this case is what is the police misconduct. There

20 are two search warrants in this case, which in and of itself, I

21 would submit to you, is indicative of the fact that there is no

22 police misconduct in this case. I submit to you you should not

23 have been left with the impression that this is a cavalier law
24 enforcement officer running roughshod over the rights of
25 criminal defendants. And if you don't make that conclusion

173

1 that under the good-faith exception, you should not suppress
2 this evidence. And the good-faith exception lays out in very
3 stark terms the four parameters that I'm talking about. Two of
4 them obviously don't apply. There's no indication here that
5 the magistrate, the district justice fully abandoned her role
6 in this case or that the warrant was facially deficient in the
7 sense that it gave permission to search the wrong location. So
8 those two are out.

9 Additionally, your Honor, I submit to you that
10 there's absolutely no way that you can conclude that the second
11 search warrant was so lacking in probable cause to be facially
12 deficient or that to cause somebody to rely on it would be
13 totally unreasonable.

14 Finally, there is no false information in this case.
15 There are no omissions of material fact which should cause the
16 good-faith exception to not apply in this case.

17 THE COURT: This is true, though, it's different
18 sides of the same coin. If he's right on Franks -- let me put

19 it this way. If an omission was recklessly made, you can't
20 have the Leon exception, can you?

21 MR. TRABOLD: I think that's accurate.

22 THE COURT: Let's now focus on what is the real
23 heart of this thing. What I need to hear from the government
24 is why -- I'm not going to structure the argument, you know
25 what Mr. Patton said, you tell me what you think about it?

174

1 MR. TRABOLD: Well, I gather that my sense of their
2 argument was that it oftentimes comes down to staleness. And
3 that this case comes down to staleness and if the chain is
4 broken, the government has no way of overcoming staleness. I
5 would absolutely disagree with that in this sense. A matter of
6 days before the second search warrant was executed, the
7 government received information from a 15-year-old victim that
8 these defendants violated her and took pictures of her back in
9 2001. But most important, as it relates to the staleness

10 issue, the victim in this case said, mere days before the
11 government executed their search warrant, she had a
12 conversation with these defendants where they indicated that
13 they would like to engage in these types of activities with her
14 again, and indicated that in no uncertain terms that they were
15 interested this doing sexual things with her. This
16 demonstrates that these two defendants at the time the
17 government executed their search warrant, still had a sexual
18 interest in children which overcomes the staleness issue. And
19 that's information the government receives three or four days
20 before the search warrant is executed. But most critically
21 here, separate and apart from the staleness issue. The cases
22 on material omission instruct you that what you need to do is
23 not look at everything in a vacuum and what you essentially
24 need to do is put the omitted information back in the warrant
25 and see if there's still probable cause. But in this case your

175

1 duty is not to just put the omitted information starkly by
2 itself, of course, the officer would have put in I searched
3 this, she even testified to this, I searched this computer, I

4 did not find any images of child pornography. However, the
5 computer was reformatted or wiped or whatever terminology she
6 would have used, and it had been re-rented to somebody else.
7 Now, I submit to you that no reasonable magistrate, when
8 presented with those set of facts, would have concluded that
9 there was no probable cause in this case. Because what you
10 essentially have are two intervening factors that would cause a
11 magistrate to conclude, okay, there is no child pornography on
12 this, however, the computer had been re-rented to somebody else
13 and the rental agency or rental company had done something to
14 the hard drive, formatted it, wiped it, whatever that may be,
15 which would explain to a magistrate why there's nothing on the
16 computer.

17 THE COURT: So are you saying, then, the defendant's
18 point that if the detective had looked harder, apropos to the
19 experts they put on who allegedly found all kinds of
20 information, if she had looked harder, she would have found
21 additional things is relevant to the analysis?

22 MR. TRABOLD: The case law does not require the law
23 enforcement officer to engage in a perfect investigation. In
24 any case, this case, any case that comes before you, judge, the

25 law enforcement officer could always do more or could always do

176

1 things in a different way or could attempt to do things in a
2 perfect way. I'm not in any way casting aspersions on the
3 investigation that was conducted, but all of that is of no
4 consequence. What a defense expert thinks the law enforcement
5 officer should have done two years after the fact is of no
6 consequence. The only issue before you is did this officer act
7 in bad faith. And assuming that you make that determination
8 that the officer acted in bad faith, if you put the omitted
9 information in, does that destroy probable cause. And our
10 position is, number one, you had the opportunity to observe the
11 officer. There can be no conclusion that this officer acted in
12 bad faith. There's no indication that this officer ran
13 roughshod over the rights of these defendants. Why would a
14 officer who had that intention, who wanted to lie to a
15 magistrate, why would you engage in these types of tactics
16 where you go get two search warrants to obtain evidence. That
17 is not conduct indicative of an officer acting in bad faith.

18 THE COURT: So to put a fine point on it, your point

19 is -- if in fact, assume she said Mr. Eberle's computer -- that

20 Mr. Eberle's computer was searched and it revealed nothing and

21 that it had been wiped or whatever the other term is, do I take

22 it that what you are saying, then, the magistrate could have

23 concluded maybe it was there and it was destroyed, wiped off,

24 that's why it wasn't there?

25 MR. TRABOLD: My point is that she would have

177

1 without question included those two additional facts, meaning

2 the computer was reformatted or wiped or whatever term you want

3 to use and it had been re-rented for a period of time.

4 THE COURT: Now, how critical -- and I don't know if

5 I asked Mr. Patton this, but when he gets up for his final

6 time, maybe I will. How critical -- well, put it this way.

7 The reasonableness of relying on the young victim's, not

8 testimony, statement at the police station and the forensic

9 interview, the reasonableness of accepting what she was saying

10 as true and concluding, for instance, that she was in fact the

11 person who was on the picture, that is an important component

12 in the whole calculus of probable cause here, isn't it?

13 MR. TRABOLD: Yes. I did not hear any evidence
14 today which would cause anybody to conclude that it was
15 anything less than perfectly reasonable for this law
16 enforcement officer and her partner to conclude that the victim
17 was telling the truth. It is absolutely laughable to conclude
18 that a law enforcement officer, when asking a victim if this is
19 a picture of them, if pictures that they have are pictures of
20 the victim, would show the victim a lineup of child pornography
21 pictures and ask her to pick herself out. That is absolutely
22 total and utter nonsense, it would never occur in a law
23 enforcement setting, especially in a case like this. You don't
24 show a 15-year-old kid other pictures of child pornography that
25 have nothing to do with them. This is what happens in this

178

1 case. And the fact that the victim has now said those are not
2 pictures of her is of no consequence. All that matters is what
3 the officers' knew when they interviewed her in March of 2005.
4 The victim comes in, is interviewed. Tells a great amount of
5 detail about what it is that happened to her at the hands of
6 these defendants. She includes in her version of events that

7 pictures were taken of me and a videotape was taken of me. At
8 the close of the interview, the officers say well, we have
9 these pictures, they ask her, without even showing her the
10 pictures, they ask her some questions to confirm in their own
11 mind whether they're even on the right track. And by that I
12 mean they ask her questions to confirm that what she says about
13 the pictures are what the pictures actually depict. If she had
14 said well, these pictures were taken of me out on Presque Isle
15 on the beach, then they would have known this isn't the girl
16 we're looking for. She describes the general factual scenario
17 that is borne out by the pictures. There's a bunch of
18 different pictures taken of me, some of them I was naked, some
19 to them I had my underwear on, some of them I had my bra on.
20 She then goes even further than that and says in the pictures I
21 know at the time, not in the pictures, I know at the time I had
22 a locket or a necklace that I wore all the time, I wore a ring
23 on one of my left fingers, I wore a particular bra. All of
24 that is borne out by the pictures. They then show her some of
25 the pictures. And even take steps to put post-its on to

1 minimize the trauma to her. She then breaks down and cries
2 when they show her the pictures and has a reaction indicative
3 of somebody that is viewing their own victimization
4 memorialized in pictures that have been on the Internet. So I
5 did not hear even the slightest shred of evidence presented
6 here today that should cause you to conclude that the officers'
7 conclusions that she was telling the truth were anything less
8 than totally reasonable.

9 I just want to sum this up in the sense of what
10 evidence of bad faith do you have coming from the officer. It
11 certainly can't be evidence from expert witnesses that either
12 work for the Public Defender's office or are paid an expert fee
13 that they would have done things differently. And the law does
14 not require law enforcement officers to conduct a perfect
15 examination or a perfect investigation.

16 THE COURT: All right, thank you, Mr. Trabold. Mr.
17 Patton, is there something you want to say in brief response?

18 MR. PATTON: The misconduct is apparent as the nose
19 on anyone's face. Getting a search warrant doesn't mean
20 anything if you withhold critical information from the judge.
21 It's the whole point of Franks v. Delaware. And the whole

22 point as to why Leon doesn't apply if there's a Franks'

23 violation. Because the misconduct is not telling the judge oh,
24 by the way, here's some evidence that would obliterate my
25 argument for why there's probable cause in this case. Whether

180

1 the police believe Tiffany's statement or not, I submit, means
2 nothing with regard to whether or not there is probable cause
3 to believe three-and-a-half years after Tiffany is saying these
4 pictures are taken of her, that the images are still on the
5 computer. When Lynn knows that it's not the same computer.
6 Because she knows, she's already confirmed that the computer
7 George used to have was from the House of Television and that
8 that got returned and then re-rented to somebody else. The
9 only way -- the fact that Tiffany said I just had a phone
10 conversation with the Eberles a couple days ago and they said
11 they wanted to make another videotape, if you even believe all
12 of that stuff, does not provide probable cause to say I can now
13 go search this person's computer because I now have probable
14 cause to believe they have child pornography on the computer.
15 Because they said they have sexual interest in children. There

16 is no evidence of that. I mean simply because somebody is
17 saying I have a sexual interest in children doesn't mean, okay,
18 you now have probable cause to go search their computer.

19 And what makes this case different from other
20 staleness cases where a law enforcement officer is saying hey,
21 we've been able to get through Internet records, ISP records,
22 that this person was logged on the Internet at this time and
23 downloaded child pornography onto their computer and even a lot
24 of time passes -- we still believe that this stuff is on the
25 computer. What is different about this case is Detective Lynn

181

1 had gotten one of George's computers. Now, this issue about
2 well, she would have told the magistrate or the district
3 justice well, the thing had been rebooted, so it may have been
4 deleted. In the affidavit she gave to get the House of
5 Television computer, she knew that the computer had already
6 been reformatted. And she still said I have probable cause to
7 believe these images are on the hard drive because I can get
8 that stuff with forensic software. The government wants to
9 make it a perfect heads they win, tails we lose argument. When

10 we want to have probable cause, we say to the judge, don't
11 worry about the fact that these may be deleted because we can
12 use forensic software to recover them. Then when they actually
13 get the computer, use the forensic software, don't find the
14 images or any child pornography, then they want to say, well,
15 that doesn't really mean anything because the thing got
16 reformatted.

17 And the opinions of the defense experts are relevant
18 on a couple of issues. You had both of them, who have done
19 forensic work, who say, look, if you know you have Eberle's
20 hard drive and it had been only re-rented for nine days and it
21 had been just reformatted but not completely wiped, if you look
22 for these images and don't find them, the reasonable conclusion
23 to be drawn by a competent forensic examiner is these things
24 were never on the hard drive. And once you reach that
25 conclusion, then Lynn has no basis of saying there is probable

182

1 cause to believe these images are on George's computer in March
2 of 2005.

3 THE COURT: All right. Thank you, Mr. Patton.

4 MR. HADLEY: Your Honor, on the motion in limine,
5 rebuttal just briefly, if I may. Just one quick sentence on
6 this. In my brief I had all the statistics about how rampant
7 pornography is on the Internet. The government cannot possibly
8 be allowed to make the leap that an interest in pornography is
9 the foundation for showing in interest in child pornography.
10 One's legal, one's illegal, there is absolutely no connection,
11 judge. The motion in limine should be granted. Thank you.

12 THE COURT: Are we all set -- I apologize, were any
13 exhibits moved or need to be moved, just to clean our record up
14 here?

15 MR. PATTON: Judge, I did not move Defendant's
16 Exhibit D, which is the records from the House of Television.

17 THE COURT: Do you want to move those?

18 MR. PATTON: I would move those.

19 THE COURT: Exhibit D is admitted. Was there
20 anything else identified that needs to be admitted?

21 MR. PATTON: The search warrants have been referred
22 to, but they're attached to my motion.

23 THE COURT: All right, they're admitted. Thank you,
24 counsel, we'll get something out on this.

25 (Whereupon, at 3:00 p.m., the proceedings were

183

1 concluded.)
